1. Introduction

The teaching of English in EGB Superior responds to one of the central responsibilities of contemporary educational systems: preparing learners to participate responsibly in an increasingly interconnected, diverse, and changing world. At this stage, adolescents are expected not only to interpret information but also to make informed decisions about what they read, write, share, and believe. Consequently, English is conceived not simply as the teaching of a foreign language but as an ethical, pedagogical, political, and philosophical practice that supports learners in participating with growing autonomy in local and global conversations.

This proposal is grounded in the principles of the Ecuadorian Constitution, recognizing education as a lifelong right that is intercultural, plurinational, democratic, secular, and oriented toward the holistic development of every learner. It promotes dialogue among diverse traditions of knowledge, valuing critical inquiry while recognizing the plurality of cultural and epistemological perspectives that shape Ecuadorian classrooms. English is therefore understood as a shared instrument for dialogue through which learners both contribute their own realities and engage with the perspectives of others.

The curriculum also acknowledges contemporary educational challenges, including digital technologies and artificial intelligence, emphasizing the ethical and informed use of these tools as part of language learning. English provides opportunities for learners to reflect on issues such as cultural diversity, environmental sustainability, social justice, and responsible participation in an interconnected world.

The proposal adopts a competency-based approach in which language learning is understood not as the accumulation of words and rules but as the gradual capacity to use English meaningfully in authentic situations. Listening, speaking, reading, writing, mediation, and multimodal communication are integrated as complementary dimensions of a single process of meaning-making. Addressed to learners between approximately eleven and fourteen years of age, the curriculum promotes increasingly autonomous, critical, and reflective language use while remaining grounded in three guiding commitments: plurality, the dignity of every learner, and coherence between curricular foundations, competencies, and classroom practice.

PROGRAMA PILOTO

2. Contribution of the English language curriculum to the development of the key competencies

At EGB Superior, the English language curriculum contributes to the development of the key competencies by integrating language learning with inquiry, critical thinking, ethical participation, creativity, and social responsibility. The competency descriptors organize learning around authentic practices through which learners use English to communicate, investigate, collaborate, create, and reflect in meaningful situations. In this way, language learning becomes connected with citizenship, science, technology, culture, well-being, and community life.

Competencia comunicativa (CC) is strengthened as learners use English to search for, evaluate, interpret, and communicate information from different sources, develop arguments supported by evidence, produce oral and written texts for different purposes, and recognize linguistic and cultural diversity as a valuable resource for communication and learning.

Competencia matemática y en ciencia y tecnología (CMCT) is developed through the interpretation and communication of mathematical and scientific information, the use of inquiry processes, the organization and presentation of data, the design of simple solutions to real problems, and participation in environmental actions that promote responsible relationships with the natural world.

Competencia ciudadana, identidad y conciencia cultural (CCICC) is promoted by encouraging learners to investigate community issues, participate in dialogue and collaborative actions, reflect on respectful coexistence and responsible digital participation, and recognize the value of cultural heritage while documenting and sharing community knowledge with respect and ethical responsibility.

Competencia digital (CD) is fostered through the responsible use of digital technologies and artificial intelligence to search for, evaluate, organize, produce, and communicate information. Learners progressively develop digital authorship, collaborative participation, critical evaluation of information, ethical use of digital tools, and responsible online behavior.

Competencia en innovación y transformación (CIT) is developed by engaging learners in identifying community needs, planning and implementing collaborative initiatives, making informed decisions, organizing resources, evaluating possible solutions, and assuming shared responsibility while considering the impact of their actions on others and on their communities.

Competencia socioemocional (CSE) is strengthened as learners assume increasing responsibility for their own learning, recognize and regulate their emotions, communicate respectfully, listen to diverse perspectives, resolve disagreements constructively, and build positive relationships based on empathy, honesty, responsibility, and mutual respect.

Competencia de expresiones culturales y artísticas (CECA) is enriched through the exploration, interpretation, creation, and communication of artistic and literary expressions from Ecuador and other parts of the world. Learners appreciate artistic diversity, participate in creative processes, reflect on the cultural and historical

PROGRAMA PILOTO

meanings of artistic works, and recognize cultural expressions as forms of personal, social, and community identity.

Together, these contributions position English not only as a language to be learned but as a means of understanding the world, engaging with others, participating responsibly in society, and contributing to the construction of more inclusive, sustainable, and intercultural communities.

PROGRAMA PILOTO

3.Curricular Threads

Thread 1: Oral comprehension

Oral comprehension at EGB Superior builds on learners who have reached the A2 listening level and prepares them to understand longer spoken texts with increasing autonomy across a wider range of listening situations. At this stage, learners move beyond recognizing familiar expressions to following extended explanations, discussions, and narratives, identifying main ideas, relevant details, speakers' purposes, and attitudes conveyed through tone and emphasis.

This progression requires learners to manage more complex listening processes, including holding information in working memory, interpreting unfamiliar vocabulary through context, making inferences, and using partial understanding as a basis for constructing meaning. It also broadens listening experiences by exposing learners to authentic voices through podcasts, interviews, documentaries, and conversations from different English-speaking communities.

Teachers combine carefully scaffolded listening materials with authentic recordings, gradually helping learners transfer listening strategies to real communicative situations. Explicit instruction focuses on predicting from titles, images, and context, listening first for the main idea and then for specific information, taking brief notes, requesting clarification when needed, and comparing interpretations with peers to strengthen comprehension and foster greater autonomy.

This thread also recognizes the diversity of English by exposing learners to a wide range of accents, voices, and varieties of the language. This plurality is presented as a natural characteristic of English, enabling learners to develop confidence, flexibility, and autonomy when listening in real-world contexts.

Thread 2: Oral interaction and production

Oral interaction and production at EGB Superior aims to develop learners' ability to participate confidently and effectively in increasingly sustained spoken communication. Beyond producing isolated responses, learners progressively learn to hold the floor for short periods, recognize conversational cues, take turns appropriately, interrupt politely, ask for clarification, return to the thread of a conversation, and express and interpret emotions through tone of voice. These social dimensions of communication are developed through varied opportunities for meaningful interaction in a supportive classroom environment.

Teachers provide structured opportunities for learners to produce increasingly extended oral discourse, such as recounting experiences, summarizing inquiries, presenting opinions, and sharing community practices. To support coherent spoken production, learners are explicitly taught discourse organization through connectors, sequencing expressions, and strategies for introducing topics, giving reasons, providing examples, and concluding ideas.

PROGRAMA PILOTO

The thread also develops learners' ability to participate naturally in conversation by recognizing verbal and non-verbal conversational cues, managing turn-taking, handling disagreement respectfully, and maintaining the flow of interaction. Explicit instruction helps learners understand how conversations are organized and how speakers cooperate to construct meaning.

Particular attention is given to the interpretation and expression of meaning through intonation and voice. Learners develop sensitivity to how tone conveys attitudes, intentions, and emotions, while gaining confidence in using their own voices to communicate effectively in different situations. Pair work, group discussions, interviews, role-plays, presentations, and collaborative projects provide authentic contexts for developing these abilities. Throughout the process, intelligible communication, willingness to participate, and respect for learners' own linguistic identities are prioritized over native-like pronunciation, recognizing Ecuadorian English as a legitimate expression within the diversity of World Englishes.

Thread 3: Reading comprehension

Reading comprehension at EGB Superior builds on learners' literacy developed in Spanish and in the languages of their communities, supported by carefully selected texts that respond to their age, interests, and English proficiency. At this stage, learners progressively move beyond literal comprehension to interpret implied meanings, identify main ideas and relevant details, recognize the organization of different text types, evaluate basic aspects of source reliability, and consider diverse perspectives across cultures, languages, and disciplines.

Reading is understood as an active process of meaning construction in which learners are explicitly taught to ask questions about a text's purpose, audience, assumptions, and point of view. Through guided practice, they develop inferential reading strategies that enable them to connect explicit information with prior knowledge, interpret implicit meanings, and critically engage with what texts communicate and omit.

This thread also recognizes that learners increasingly encounter English through texts from different areas of knowledge. Informational, scientific, historical, environmental, cultural, and literary texts provide opportunities to communicate across disciplines, broaden learners' general knowledge, and understand how ideas connect across different fields of study.

A broad conception of texts is adopted, including narratives, chronicles, informational texts, literary works, digital texts, and functional texts, each with its own purpose, structure, and reading practices. Literature is presented from a plural perspective that values both classical and contemporary works, oral traditions, graphic narratives, and texts written by Ecuadorian and international authors, fostering reading as a means of understanding multiple voices, cultures, and ways of interpreting the world.

Thread 4: Written production

Written production at EGB Superior guides learners from supported writing toward increasingly autonomous and purposeful text creation. At this stage, learners begin to develop their own written voice by producing texts that express experiences, opinions, ideas, and information for different audiences and communicative purposes. They progressively move beyond models and sentence frames to create short narratives,

PROGRAMA PILOTO

descriptions, opinion texts, reports, invitations, agreements, blog entries, posters, and other functional texts with greater independence.

Writing is understood as a recursive process in which learners plan, draft, revise, receive feedback, and publish their work for authentic audiences inside and beyond the classroom. Teachers provide scaffolds according to learners' needs, including vocabulary support, graphic organizers, sentence frames, peer-feedback protocols, and revision checklists, gradually withdrawing this support as learners gain confidence and autonomy.

This thread also promotes metalinguistic awareness by helping learners recognize spelling patterns, punctuation, connectors, basic word formation, and other features of written English while comparing them with the languages they already know. Through this process, learners strengthen both their English writing and their understanding of language as a system. Errors are approached as a natural part of learning and as opportunities for reflection, revision, and continuous improvement.

Written production develops within a supportive classroom environment where learners are encouraged to express their own ideas, experiment with language, and refine their writing through constructive feedback. By valuing the writing process, authentic communication, and the individuality of each learner's voice, the classroom fosters confidence, autonomy, and purposeful written communication in English.

PROGRAMA PILOTO

PROGRAMA PILOTO

4.Specific Competency Matrix

Specific competency	Assessment indicators
SC.CE.EFL.4.1. Development of attentive listening and assertiveness through interviews with members of the school community and the local environment, to learn from people with different occupations, knowledge, and life experiences, and to recognize the value of their voices and contributions to the community. CC, CCCC, CSE.	I.EFL.4.1.1. Formulates follow-up questions and requests clarification during interviews with community members, using appropriate interview formulas (e.g., “Could you explain...?” and “What did you mean by...?”). I.EFL.4.1.2. Identifies the main ideas and at least three specific details in an interview recording, taking notes in English with keywords and short phrases. I.EFL.4.1.3. Recognizes the value of diverse occupational and life experiences, naming at least one specific contribution the interviewee has made to the community.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.2.d.1. Turn-taking and discourse-management strategies in spoken English: yielding, taking, and holding the floor in conversations, discussions, and interviews. EFL.4.2.d.2. Opening, closing, and management formulas in formal and informal interviews: self-introductions, requests for clarification, reformulations, and leave-takings. EFL.4.1.d.3. Active listening strategies: note-taking with keywords, confirming comprehension, requesting repetition, and paraphrasing what was heard. EFL.4.1.d.5. Formal and informal spoken registers in English: differences in vocabulary, intonation, and formulas depending on the communicative situation. EFL.4.1.d.19. Intonation in yes/no and wh- questions versus statements: rising and falling patterns and their communicative value. EFL.4.1.d.21. Weak forms and vowel reduction in English: pronunciation of function words (to, for, of, and, was) in connected speech. EFL.4.2.d.23. Pronunciation of phonemes that pose difficulty: minimal pairs, long and short vowels, the consonants /θ/, /ð/, /v/, and frequent diphthongs. EFL.4.1.d.32. Listening comprehension strategies: contextual anticipation, selective listening, keyword identification, and comprehension checks.	EFL.4.1.p.1. Identifies the main idea and concrete details in recordings, short news items, announcements, and interviews on school and community topics. EFL.4.2.p.10. Takes part in interviews with community members, asking follow-up questions, requesting clarification, and thanking participants.	EFL.4.1.a.1. Listens attentively to others' experiences, opinions, and arguments. EFL.4.2.a.2. Respects turns of speech and the time of those who intervene in discussions, interviews, and presentations. EFL.4.1.a.3. Recognizes what each person wishes to share and what they do not, showing discretion and care in interviews and listening circles. EFL.4.1.a.16. Uses English with growing confidence in new communicative situations, tolerating the inherent uncertainty of the process.

PROGRAMA PILOTO

Methodological Guidelines

This competency develops learners' ability to listen attentively, ask meaningful questions, and communicate with assertiveness while recognizing the knowledge, experiences, and contributions of others. Listening and assertiveness are presented as complementary democratic practices that encourage learners to value both the voices of others and their own.

The project is organized around three circles of voices: members of the school community, people from the local community, and partner classrooms or speakers from other countries. Through interviews conducted primarily in English, learners explore different experiences, occupations, and forms of knowledge, while recognizing that participants may occasionally draw on their home language, with key ideas later mediated into English.

Project-Based Learning (PBL) provides the central methodology, complemented by dialogic interviewing, inquiry-based listening, and Cooperative Learning through structured rehearsals and rotating responsibilities. The culminating product is the Working Lives Sound File: Voices, Knowledges, and Experiences from Around Us, a collaborative audio collection in which each team records, edits, and presents an interview accompanied by a brief introduction, selected transcribed excerpts, and a closing statement recognizing the interviewee's contribution. Throughout the project, written supports serve to strengthen oral communication rather than replace it.

Learners work in rotating roles that include interviewer, active listener, clarifier, note-keeper, and closing curator. Role rotation ensures that every learner develops the full range of interviewing, listening, note-taking, clarification, and presentation skills while participating actively in all stages of the inquiry process.

PROGRAMA PILOTO

Interdisciplinary Connections

This competency connects English learning with Language and Literature, Social Studies, Natural Sciences, Cultural and Artistic Education, Mathematics, and Physical Education through inquiry, active listening, oral communication, and the exploration of the knowledge, experiences, and contributions of people within the school, the community, and beyond. By conducting interviews, interpreting different perspectives, and presenting findings in English, learners use language to value diverse forms of knowledge and strengthen meaningful communication.

Language and Literature provides the central context through the interview as an oral and journalistic genre. Learners develop attentive listening, assertive interaction, oral questioning, and the production of short transcribed excerpts and contribution notes while engaging with authentic communicative situations.

Social Studies contributes through the exploration of community life, occupations, migration, local institutions, and the social and economic experiences that shape everyday life. Learners recognize how different forms of work and community participation contribute to society.

Natural Sciences is integrated when interviews address health, environmental management, or technical occupations, promoting the accurate communication of scientific ideas and responsible attitudes toward the use of natural and community resources.

Cultural and Artistic Education connects through the creation of the collaborative sound file, the selection of meaningful interview excerpts, and the ethical representation of other people's voices and experiences as cultural expressions.

Mathematics supports the interpretation and communication of numerical information that emerges during interviews, such as years of experience, working hours, distances, costs, and other simple quantitative data.

Physical Education contributes through the development of body awareness, posture, breathing, eye contact, attention, and self-regulation, all of which strengthen effective oral interaction during interviews.

Through these interdisciplinary connections, English becomes a means to inquire, listen with empathy, communicate respectfully, recognize the knowledge of others, and participate responsibly in dialogue within and beyond the local community.

PROGRAMA PILOTO

PROGRAMA PILOTO

Specific competency	Assessment indicators
SC.EFL4.2. Collaboration in discussion groups on school and community issues through the exchange of ideas and proposals to support collective decision-making with peers, recognizing that agreements are built through dialogue and cooperation.CC, CCCC, CSE, CIT.	I.EFL.4.2.1. Sustains a turn in a discussion by contributing a concrete example or proposal that addresses a real school or community issue. I.EFL.4.2.2. Responds to a classmate's idea by expressing agreement or respectful disagreement and providing a reason, using discourse markers (e.g., "I agree because...", "I see your point, however..."). I.EFL.4.2.3. Summarizes the main agreements after a class discussion in two or three connected sentences in English. I.EFL.4.2.4. Demonstrates understanding that collective decisions are built through dialogue by identifying at least one moment when the group changed or refined an initial idea.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.2.d.1. Turn-taking and discourse-management strategies in spoken English: yielding, taking, and holding the floor in conversations, discussions, and interviews. EFL.4.1.d.3. Active listening strategies: note-taking with keywords, confirming comprehension, requesting repetition, and paraphrasing what was heard. EFL.4.4.d.15. Ways of talking about the future in English: will (predictions and spontaneous decisions), be going to (plans), and the present continuous with a future meaning. EFL.4.1.d.24. Informational prominence and emphasis: use of sentence stress to highlight new or contrastive information in spoken discourse. EFL.4.2.d.28. Active citizenship and collective responsibility: participation in community decisions, school campaigns, and actions for the common good.	EFL.4.1.p.3. Infers basic implicit information in dialogues and conversations, identifying the speaker's attitude, intention, and tone. EFL.4.2.p.7. Presents information orally on an academic or community topic with visual support, organizing ideas clearly. EFL.4.2.p.8. Expresses opinions and justify them briefly with relevant reasons and examples in classroom conversations and discussions. EFL.4.2.p.11. Sustains discussions and dialogue tables on school and community topics, contributing proposals and concrete examples. EFL.4.2.p.13. Uses listening circles to share concerns, experiences, and possible solutions with peers, taking turns speaking. EFL.4.2.p.15. Expresses agreement and disagreement respectfully and propose alternatives in classroom and community debates and discussions. EFL.4.2.p.46. Cooperates with classmates on shared tasks and projects by responsibly distributing roles, resources, and time. EFL.4.4.p.48. Reflects collectively on the learning processes at the close of a unit, sharing what was learned and what students still wish to explore.	EFL.4.1.a.1. Listens attentively to others' experiences, opinions, and arguments. EFL.4.2.a.2. Respects turns of speech and the time of those who intervene in discussions, interviews, and presentations. EFL.4.2.a.10. Cooperates with classmates on group tasks, maintains participation, and acknowledges each person's contributions. EFL.4.2.a.13. Commits to the classroom's collective agreements and supports peers when they face difficulties during shared work.

PROGRAMA PILOTO

Methodological Guidelines

This competency develops learners' ability to participate in structured discussions where ideas are presented, justified, negotiated, and refined collaboratively. Through oral interaction, learners learn to express opinions, support proposals with reasons, listen attentively to different perspectives, and work toward shared agreements using English as a tool for democratic participation.

The project focuses on authentic topics drawn from school, community, and everyday life, encouraging learners to discuss real situations and develop proposals that respond to meaningful questions. Discussions are organized around issues that require collaborative decision-making, allowing learners to connect English with situations that are relevant to their own contexts.

Project-Based Learning (PBL) provides the central methodology, complemented by Socratic-style dialogic discussion, Cooperative Learning structures, and a shared discussion protocol that guides participation. The culminating product is the Round of Discussion Tables: Voices Toward Agreement, a series of recorded discussion sessions in English in which each group analyzes a real issue, negotiates a shared agreement, and presents a brief oral summary of its conclusions. Written agreements serve as concise records of the collaborative decisions reached through oral interaction.

Learners work in rotating roles that include opener, proposer, builder, listening keeper, and agreement scribe. Role rotation ensures that every learner develops the ability to introduce ideas, support arguments, respond constructively to others, facilitate equitable participation, and summarize collective decisions while strengthening confidence, cooperation, and responsible participation in group discussions.

PROGRAMA PILOTO

Interdisciplinary Connections

This competency connects English learning with Language and Literature, Social Studies, Natural Sciences, Cultural and Artistic Education, Mathematics, and Physical Education through collaborative discussion, argumentation, active listening, and collective decision-making. By participating in structured discussions, negotiating proposals, and reaching shared agreements in English, learners use language to communicate ideas, consider different perspectives, and contribute responsibly to their school and community.

Language and Literature provides the central context through structured oral discussion, argumentation, attentive listening, and the use of agreement and disagreement markers. Learners develop oral participation by presenting ideas, supporting opinions with reasons, and producing brief summaries of collective decisions.

Social Studies contributes through the discussion of issues related to school, the local community, and civic life. Learners explore democratic participation, cooperation, community responsibilities, and collaborative decision-making as everyday social practices.

Natural Sciences is integrated when discussions address environmental topics and the responsible use of shared resources, promoting informed communication about everyday issues affecting the natural and community environment.

Cultural and Artistic Education connects through the creation and presentation of collective agreements, recorded discussions, and oral summaries, recognizing dialogue and collaborative expression as forms of cultural participation.

Mathematics supports the interpretation and communication of simple numerical information that emerges during discussions, including quantities, proportions, frequencies, and other basic data used to support proposals and decisions.

Physical Education contributes through the development of body awareness, posture, breathing, eye contact, attention, and self-regulation, strengthening the communication skills required for effective participation in collaborative discussions.

Through these interdisciplinary connections, English becomes a means to exchange ideas, build arguments, negotiate shared solutions, and participate respectfully and responsibly in democratic dialogue within the school and the community.

PROGRAMA PILOTO

Specific competency	Assessment indicators
SC.EFL4.3. Exchange of family and everyday experiences through accounts, descriptions, and conversations with follow-up questions, to share how life is experienced in different families and communities in Ecuador and around the world, valuing diversity in family structures and ways of living. CC, CCCC, CSE.	I.EFL.4.3.1. Narrates a family or everyday experience using the simple past and past continuous in connected sentences, with appropriate time markers. I.EFL.4.3.2. Asks at least two follow-up questions during a conversation with a classmate about family life or daily routines across communities. I.EFL.4.3.3. Identifies at least two similarities and two differences between family experiences described by peers from different backgrounds or contexts.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.2.d.6. Oral narrative resources in English: sequence connectors, time markers, and formulas for personal and fictional accounts. EFL.4.4.d.13. Past tenses in English: simple past (regular and irregular), past continuous, and the contrast between completed actions and actions in progress. EFL.4.1.d.21. Weak forms and vowel reduction in English: pronunciation of function words (to, for, of, and, was) in connected speech. EFL.4.3.d.26. Diversity of cultural traditions and ways of life in communities across Asia, Africa, the Pacific, and the Americas: celebrations, foods, and forms of organization. EFL.4.3.d.31. Linguistic mediation: strategies for reformulating, paraphrasing, and simplifying information across languages or for different audiences.	EFL.4.2.p.5. Narrates family, personal, or fictional experiences using past tenses, time markers, and appropriate sequence connectors. EFL.4.2.p.6. Describes people, objects, places, and community processes with concrete details and comparisons. EFL.4.4.p.36. Paraphrases and reformulates, orally or in writing, information read or heard in English from another language of the classroom or the community. EFL.4.3.p.42. Contrasts English with languages known to identify similarities and differences that facilitate comprehension and production. EFL.4.2.p.45. Compares and describe natural environments, communities, and ways of life from different contexts of the world using connected descriptions.	EFL.4.2.a.4. Shows curiosity about ways of life, traditions, and ways of organizing knowledge in different communities of the world. EFL.4.1.a.5. Values the varieties of English and the languages of the place as equally valid resources for communication and learning. EFL.4.3.a.11. Acts as a mediator between languages, people, or perspectives, facilitating mutual understanding in the classroom.

PROGRAMA PILOTO

Methodological Guidelines

This competency develops learners' ability to participate in authentic conversations about family life and everyday experiences, using English to share personal narratives, ask meaningful questions, listen attentively, and interact naturally with others. Personal experiences become opportunities to strengthen oral communication while developing confidence, fluency, and meaningful interpersonal interaction.

Project-Based Learning (PBL) provides the central methodology, complemented by active, dialogic, and inquiry-based approaches. The culminating product is Voices from Our Households: A Conversational Album of Family Experiences in English, a collaborative collection of recorded conversations in which learners share and explore family and everyday experiences. The selected recordings are organized into a shared album that can be presented within the school community, highlighting authentic communication as the central outcome of the project.

The project creates opportunities for learners to strengthen oral interaction by using connected speech, past-time references, clarification strategies, active listening, and conversational support in meaningful exchanges with classmates. Authentic communication is prioritized so that linguistic resources are developed within real conversations rather than through isolated practice.

Learners work in rotating roles that include narrator, active listener, follow-up asker, repair partner, and note-keeper and curator. Role rotation ensures that every learner develops confidence in telling personal experiences, listening attentively, asking follow-up questions, supporting communication when difficulties arise, and selecting meaningful contributions for the collaborative conversational album.

PROGRAMA PILOTO

Interdisciplinary Connections

This competency connects English learning with Language and Literature, Social Studies, Natural Sciences, Cultural and Artistic Education, Mathematics, and Physical Education through personal narratives, oral interaction, and the exploration of family and everyday experiences. By sharing, listening to, and comparing personal stories, learners use English to strengthen communication while recognizing the diversity of family life and community experiences.

Language and Literature provides the central context through autobiographical narration and oral storytelling. Learners develop narrative skills by organizing experiences, expressing ideas chronologically, and engaging listeners through meaningful oral interaction.

Social Studies contributes through the exploration of family structures, community life, migration, and cultural diversity. Learners compare everyday experiences across Ecuador and other communities, recognizing the variety of ways in which families and households are organized.

Natural Sciences is integrated when conversations address everyday routines related to nutrition, hygiene, sleep, well-being, and sustainable household practices, promoting accurate communication about health and daily life.

Cultural and Artistic Education connects through the incorporation of family stories, songs, photographs, recipes, crafts, and other cultural expressions that enrich oral communication and recognize family heritage as a source of shared knowledge.

Mathematics supports the use and interpretation of simple quantitative information related to family life, including household size, generational composition, distances, and other basic comparative data.

Physical Education contributes through discussions about daily routines, physical activity, games, movement, and healthy lifestyles, connecting oral communication with experiences related to well-being and active living.

Through these interdisciplinary connections, English becomes a means to share personal experiences, appreciate cultural diversity, strengthen interpersonal communication, and recognize family and community life as valuable sources of learning and dialogue.

PROGRAMA PILOTO

Specific competency	Assessment indicators
SC.EFL4.4. Critical comparison of short audiovisual news reports on the same event, analyzing sources, perspectives, and voices to understand how information varies with the narrator, developing critical awareness of media and information. CC, CCCC, CD.	I.EFL.4.4.1. Identifies the topic, the main perspective, and at least two sources or voices in each of two short news reports on the same event. I.EFL.4.4.2. Compares how the same event is presented in two reports, identifying at least one difference in emphasis, vocabulary, or content. I.EFL.4.4.3. Briefly explains why information can be presented differently depending on who tells it, offering one concrete reason supported by evidence from the reports.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.1.d.3. Active listening strategies: note-taking with keywords, confirming comprehension, requesting repetition, and paraphrasing what was heard. EFL.4.1.d.19. Intonation in yes/no and wh- questions versus statements: rising and falling patterns and their communicative value. EFL.4.1.d.24. Informational prominence and emphasis: use of sentence stress to highlight new or contrastive information in spoken discourse. EFL.4.3.d.30. Media and informational perspectives: how different outlets present the same event, and the notions of source, bias, and credibility. EFL.4.1.d.32. Listening comprehension strategies: contextual anticipation, selective listening, keyword identification, and comprehension checks.	EFL.4.1.p.1. Identifies the main idea and concrete details in recordings, short news items, announcements, and interviews on school and community topics. EFL.4.1.p.2. Distinguishes perspectives, voices, and approaches in short audiovisual reports on the same event, recognizing differences in how the information is presented. EFL.4.1.p.4. Follows sequences of oral instructions and short videos to complete tasks, taking notes using keywords and checking comprehension. EFL.4.2.p.14. Compares two texts, sources, or perspectives on the same topic orally, citing evidence to point out similarities and differences. EFL.4.4.p.32. Writes short opinion paragraphs in English with a claim, reasons, and a supporting example or piece of evidence.	EFL.4.2.a.6. Is willing to revise their own perspectives when encountering viewpoints different from their own. EFL.4.3.a.9. Is willing to compare and question information from different sources, recognizing that not everything written or published is equally reliable.

PROGRAMA PILOTO

Methodological Guidelines

This competency develops learners' ability to analyze and compare English-language news reports, recognizing that the same event can be presented from different perspectives depending on the sources, voices, and language choices used. Through critical observation and discussion, learners strengthen their ability to interpret information, identify different viewpoints, and reflect on how meaning is constructed in the media.

Project-Based Learning (PBL) provides the central methodology, complemented by inquiry-based, dialogic, and critical media approaches. The culminating product is The Same Event, Different Tellings: A Comparative Newsroom in English, a collaborative collection of comparison cards and oral presentations in which learners analyze how different English-language news reports present the same event. The final products are organized into a comparative newsroom that may take the form of a wall display, a shared folder, or a digital archive for the school community.

The project guides learners to distinguish between what a report communicates, how it communicates it, and whose perspectives are represented. Through repeated viewing, collaborative analysis, and discussion, learners examine sources, viewpoints, language choices, and the representation of different voices while developing critical media literacy through English.

Learners work in rotating roles that include source tracker, perspective reader, voice mapper, language analyst, and comparative editor. Role rotation ensures that every learner develops the ability to identify sources, analyze perspectives, examine language choices, compare viewpoints, and communicate findings as part of the collaborative newsroom.

PROGRAMA PILOTO

Interdisciplinary Connections

This competency connects English learning with Language and Literature, Social Studies, Natural Sciences, Cultural and Artistic Education, Mathematics, and Physical Education through the critical analysis of English-language news reports and media texts. By comparing perspectives, identifying sources, and examining how information is presented, learners develop critical reading and communication skills while engaging with contemporary issues from multiple viewpoints.

Language and Literature provides the central context through the analysis of perspective, framing, voice, and the distinction between direct and indirect speech in journalistic and literary texts. Learners strengthen their ability to interpret how language shapes meaning and audience understanding.

Social Studies contributes through the comparison of news reports from different contexts, promoting reflection on media systems, public opinion, the circulation of information, and the importance of critically evaluating information sources.

Natural Sciences is integrated when news reports address environmental issues or scientific topics, encouraging learners to communicate scientific information accurately and recognize how different perspectives influence the presentation of factual events.

Cultural and Artistic Education connects through the analysis of audiovisual elements such as images, camera angles, music, color, and graphic design, recognizing that visual language also contributes to the construction of meaning in media texts.

Mathematics supports the interpretation and communication of numerical information presented in news reports, including statistics, percentages, dates, charts, and other data used to support different perspectives.

Physical Education contributes when news reports focus on sports and physical activity, promoting reflection on fair play, ethics, and the social significance of sport in different communities.

Through these interdisciplinary connections, English becomes a means to critically interpret information, compare perspectives, communicate evidence-based ideas, and participate thoughtfully in an increasingly interconnected media environment.

PROGRAMA PILOTO

Specific competency	Assessment indicators
SC.EFL4.5. Expression of awareness of everyday challenges in pre-adolescent life through conversations and dialogue circles, to share concerns, experiences, and possible solutions with peers, recognizing how daily conditions can affect health and well-being. CC, CSE.	I.EFL.4.5.1. Shares a personal concern or experience related to everyday pre-adolescent life using connected sentences and appropriate vocabulary while respecting the listening circle format. I.EFL.4.5.2. Identifies at least two possible solutions to a shared challenge discussed in the listening circle and explains how each could affect health or well-being. I.EFL.4.5.3. Listens attentively to peers without interrupting and confirms understanding by paraphrasing a classmate's statement before responding

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.2.d.1. Turn-taking and discourse-management strategies in spoken English: yielding, taking, and holding the floor in conversations, discussions, and interviews. EFL.4.2.d.4. Formulas to express complaints and claims assertively: description of the problem, expression of needs, and proposal of a solution. EFL.4.4.d.16. First conditional: structure: If + simple present + will; used to express possible consequences and prevention situations. EFL.4.4.d.27. Rights of young people: Convention on the Rights of the Child, rights of participation, protection, and well-being in school and community contexts. EFL.4.4.d.36. Vocabulary by semantic fields: family and relationships; health and well-being; technology and media; the environment; work; and rights.	EFL.4.1.p.3. Infers basic implicit information in dialogues and conversations, identifying the speaker's attitude, intention, and tone. EFL.4.2.p.11. Sustains discussions and dialogue tables on school and community topics, contributing proposals and concrete examples. EFL.4.2.p.12. Expresses complaints and claims about products and services by clearly describing the problem and proposing a solution in an assertive yet respectful manner. EFL.4.2.p.13. Uses listening circles to share concerns, experiences, and possible solutions with peers, taking turns speaking. EFL.4.2.p.43. Describes practices of care for the body, health, and emotional well-being in short presentations, using appropriate vocabulary.	EFL.4.1.a.1. Listens attentively to others' experiences, opinions, and arguments. EFL.4.1.a.3. Recognizes what each person wishes to share and what they do not, showing discretion and care in interviews and listening circles. EFL.4.2.a.12. Offers and requests help with confidence, recognizing that collaboration is an essential part of learning. EFL.4.4.a.19. Cares for their physical and emotional well-being and shows empathy for the experiences of peers who face everyday challenges.

PROGRAMA PILOTO

PROGRAMA PILOTO

Methodological Guidelines

This competency develops learners' ability to express concerns, listen attentively, propose possible solutions, and reflect on the relationship between everyday experiences, health, and well-being through meaningful interaction in English. The listening circle provides a structured communicative space where learners practice empathy, respectful dialogue, and collaborative problem-solving while using English for authentic communication.

Project-Based Learning (PBL) provides the central methodology, complemented by dialogic, cooperative, and inquiry-based approaches. The culminating product is Listening Circles in English: A Companion of Concerns and Possible Solutions for Everyday Life, a collaborative collection of concerns, reflections, and possible solutions documented through cards, wall displays, or shared digital resources that can be consulted by other classrooms.

The project establishes a structured format for listening circles in which learners share concerns, paraphrase ideas before responding, collaboratively explore possible solutions, and reflect on how everyday situations may influence health and well-being. English is used as the language for meaningful communication, encouraging learners to express ideas, ask for support, and participate respectfully in collaborative dialogue.

Learners work in rotating roles that include speaker, paraphraser, solution proposer, affirmer, and circle keeper. Role rotation ensures that every learner develops confidence in expressing personal ideas, listening actively, paraphrasing accurately, proposing thoughtful solutions, supporting classmates, and contributing to the collaborative companion.

Interdisciplinary Connections

This competency connects English learning with Language and Literature, Social Studies, Natural Sciences, Cultural and Artistic Education, Mathematics, and Physical Education through dialogue, active listening, and collaborative reflection on everyday experiences related to health and well-being. By expressing concerns, paraphrasing ideas, and proposing solutions, learners strengthen communication while developing empathy, critical reflection, and responsible participation.

Language and Literature provides the central context through paraphrasing, summarizing, and the development of an assertive communicative style. Learners strengthen their ability to reformulate ideas, respond respectfully, and adapt language to purpose and audience.

Social Studies contributes through discussions about adolescents' rights, participation, well-being, and the creation of safe and supportive school communities, promoting responsible citizenship and democratic dialogue.

Natural Sciences is integrated through conversations about nutrition, sleep, physical activity, emotional well-being, and other everyday factors that influence health, encouraging learners to communicate responsibly about personal and community well-being.

Cultural and Artistic Education connects through the use of illustrations, photographs, sound recordings, and other creative representations that enrich the companion and promote respectful expression of adolescents' experiences and perspectives.

Mathematics supports the interpretation and communication of simple quantitative information, including frequencies, percentages, and survey results, allowing learners to describe and analyze information related to the concerns explored in the listening circles.

Physical Education contributes through discussions about movement, rest, physical activity, and healthy lifestyles, reinforcing the relationship between physical well-being, emotional balance, and everyday life.

Through these interdisciplinary connections, English becomes a means to express personal experiences, promote respectful dialogue, strengthen collaborative problem-solving, and support learners' well-being within their school and community.

PROGRAMA PILOTO

Specific competency	Assessment indicators
SC.EFL4.6. Creative oral expression through improvisation based on prompts, images, and unexpected situations, using role-plays and spontaneous interaction to build confidence and explore English creatively and flexibly. CC, CSE, CAEC.	I.EFL.4.6.1. Produces a short, improvised oral interaction in response to a visual prompt or an unexpected situation, maintaining communicative flow. I.EFL.4.6.2. Uses at least three vocabulary items or expressions new to the speaker, demonstrating a willingness to take linguistic risks. I.EFL.4.6.3. Briefly reflects on the experience of improvising in English, identifying one thing that felt easy and one that felt challenging.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.1.d.5. Formal and informal spoken registers in English: differences in vocabulary, intonation, and formulas depending on the communicative situation. EFL.4.2.d.6. Oral narrative resources in English: sequence connectors, time markers, and formulas for personal and fictional accounts. EFL.4.1.d.19. Intonation in yes/no and wh-questions versus statements: rising and falling patterns and their communicative value. EFL.4.1.d.20. Word stress in vocabulary: stressed syllables in two-syllable nouns and verbs, and stress shift driven by grammatical function EFL.4.1.d.21. Weak forms and vowel reduction in English: pronunciation of function words (to, for, of, and, was) in connected speech. EFL.4.2.d.23. Pronunciation of phonemes that pose difficulty: minimal pairs, long and short vowels, the consonants /θ/, /ð/, /v/, and frequent diphthongs.	EFL.4.2.p.5. Narrates family, personal, or fictional experiences using past tenses, time markers, and appropriate sequence connectors. EFL.4.2.p.9. Improvises short oral interactions based on images, unexpected situations, and role plays, exploring English creatively. EFL.4.1.p.38. Relies on images, diagrams, gestures, and visual supports to sustain comprehension and production in English when vocabulary is insufficient.	EFL.4.4.a.15. Accepts error as part of the learning process and revises their own production with a willingness to improve. EFL.4.1.a.16. Uses English with growing confidence in new communicative situations, tolerating the inherent uncertainty of the process. EFL.4.2.a.22. Enjoys creative improvisation and play with language as ways of exploring English with confidence.

PROGRAMA PILOTO

Methodological Guidelines

This competency develops learners' ability to communicate spontaneously in English by responding to unexpected situations with increasing confidence, fluency, and autonomy. Through structured improvisation, learners develop the linguistic and communicative strategies needed to initiate, sustain, and conclude spoken interactions while using both verbal and non-verbal resources effectively.

Project-Based Learning (PBL) provides the central methodology, complemented by theater-based, dialogic, and inquiry approaches. The culminating product is The Improvisation Studio: A Live Repertoire of Short Spontaneous Performances in English, a collaborative collection of recorded improvisations and a companion of communication strategies that can be shared with other classrooms.

The project engages learners in a variety of spontaneous speaking tasks, including short monologues, role-plays, and interactions based on unexpected prompts or visual stimuli. Through repeated practice, reflection, and collaborative feedback, learners strengthen the strategies that support spontaneous oral communication while developing confidence and viewing mistakes as a natural part of the learning process.

Learners work in rotating roles that include improviser, prompt giver, calm keeper, strategy spotter, and studio archivist. Role rotation ensures that every learner develops confidence in spontaneous speaking, recognizes effective communication strategies, supports peers during oral interaction, and contributes to documenting the collective repertoire of performances.

PROGRAMA PILOTO

Interdisciplinary Connections

This competency connects English learning with Language and Literature, Social Studies, Natural Sciences, Cultural and Artistic Education, Mathematics, and Physical Education through spontaneous oral communication, improvisation, and role-play activities. By responding to unexpected situations, describing images, and participating in authentic communicative tasks, learners develop confidence, flexibility, and strategic communication while strengthening creativity, self-regulation, and public speaking skills.

Language and Literature provides the central context through the analysis and production of spontaneous oral discourse, dialogue, monologue, and other oral genres that require coherence, interaction, and effective communication without prior scripting.

Social Studies contributes through prompts and communicative situations inspired by different communities, cultural practices, and public events, encouraging learners to recognize the social and cultural diversity of English-speaking contexts while communicating appropriately in authentic situations.

Natural Sciences is integrated through the understanding of physiological processes involved in oral communication, including breathing, posture, heart rate, and self-regulation, helping learners recognize how these factors influence effective spoken performance.

Cultural and Artistic Education connects through improvisation, theatre, role-play, and performance activities that promote creativity, expression, interpretation, and confidence while using English for authentic communication.

Mathematics supports the organization and management of improvisation activities through the use of time, sequencing, pacing, and measurement, enabling learners to structure and sustain spoken interactions effectively.

Physical Education contributes by promoting body awareness, posture, breathing, gesture, and movement as essential elements of confident oral communication and effective public performance.

Through these interdisciplinary connections, English becomes a means to communicate spontaneously, respond confidently to unexpected situations, apply communication strategies effectively, and participate creatively in authentic interactions across academic, social, and cultural contexts.

PROGRAMA PILOTO

Specific competency	Assessment indicators
SC.EFL4.7. Assertive and respectful communication when expressing complaints and claims about products and services, including problem descriptions and proposed solutions, to communicate concerns clearly while recognizing complaints as legitimate expressions of consumer rights and responsibilities. CC, CSE, CCCC.	I.EFL.4.7.1. Clearly and respectfully describes a problem with a product or service, using past-tense narration and specific details (what, when, where, how). I.EFL.4.7.2. Proposes at least one concrete solution to the problem, using appropriate modal language (e.g., "I would like...", "Could you please...?", "I think it would be fair if..."). I.EFL.4.7.3. Recognizes complaints and claims as legitimate exercises of consumer rights and identifies at least one right that applies to the described situation.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.2.d.2. Opening, closing, and management formulas in formal and informal interviews: self-introductions, requests for clarification, reformulations, and leave-takings. EFL.4.2.d.4. Formulas to express complaints and claims assertively: description of the problem, expression of needs, and proposal of a solution. EFL.4.1.d.5. Formal and informal spoken registers in English: differences in vocabulary, intonation, and formulas depending on the communicative situation. EFL.4.1.d.24. Informational prominence and emphasis: use of sentence stress to highlight new or contrastive information in spoken discourse. EFL.4.4.d.36. Vocabulary by semantic fields: family and relationships; health and well-being; technology and media; the environment; work; and rights.	EFL.4.1.p.3. Infers basic implicit information in dialogues and conversations, identifying the speaker's attitude, intention, and tone. EFL.4.2.p.12. Expresses complaints and claims about products and services by clearly describing the problem and proposing a solution in an assertive yet respectful manner. EFL.4.2.p.15. Expresses agreement and disagreement respectfully and propose alternatives in classroom and community debates and discussions.	EFL.4.2.a.2. Respects turns of speech and the time of those who intervene in discussions, interviews, and presentations. EFL.4.4.a.19. Cares for their physical and emotional well-being and shows empathy for the experiences of peers who face everyday challenges.

PROGRAMA PILOTO

Methodological Guidelines

To develop this competency, learning is organized through Project-Based Learning (PBL), supported by dialogic, role-play, and case-based approaches. The recurring product, The Consumer Voice Studio: A Repertoire of Complaints, Claims, and Proposed Solutions in English for Everyday Products and Services, engages learners in authentic situations involving products and services from their daily lives. Through recorded interactions, short written follow-ups, and a shared companion of useful expressions and strategies, learners practice expressing complaints respectfully, proposing appropriate solutions, and selecting language according to different communicative contexts.

The pedagogical focus is to help learners develop assertive and respectful communication when addressing problems related to products or services. They learn to describe what happened, explain its impact, propose realistic solutions, and adapt their register to different situations, recognizing that effective complaints seek constructive resolution rather than confrontation. Role-play and case-based activities provide opportunities to rehearse these strategies while strengthening confidence, responsibility, and awareness of consumer rights.

Teams work in rotating roles: complainant (presents the problem and proposes a solution), service representative (responds and asks for clarification), rights advisor (identifies the consumer right involved), register watcher (monitors tone, politeness, and appropriateness), and studio archivist (documents the interaction and prepares the companion materials). Rotating roles ensure that every learner develops both the linguistic and interpersonal skills required to participate confidently in real-life situations.

PROGRAMA PILOTO

Interdisciplinary Connections

This competency connects English learning with Language and Literature, Social Studies, Natural Sciences, Cultural and Artistic Education, Mathematics, and Physical Education through authentic situations in which learners express complaints, make claims, propose solutions, and communicate assertively in everyday consumer contexts. By participating in role-plays and problem-solving tasks, learners develop communicative competence while strengthening civic awareness, critical thinking, and responsible decision-making.

Language and Literature provides the central context through the production of argumentative texts, formal correspondence, and oral interactions that require appropriate register, politeness strategies, and audience awareness. Learners strengthen their ability to communicate clearly, respectfully, and purposefully in both spoken and written English.

Social Studies contributes through the exploration of consumer rights, civic responsibility, and the institutions that protect citizens in everyday situations. Learners recognize how respectful communication and informed participation support the exercise of rights and responsibilities within society.

Natural Sciences is integrated through the analysis of everyday products and services, encouraging accurate description of materials, product quality, safety considerations, and responsible use and storage of resources when communicating complaints or claims.

Cultural and Artistic Education connects through role-play activities that develop expressive communication, dialogue, gesture, and voice as essential elements of interpersonal interaction and civic participation.

Mathematics supports the interpretation and communication of numerical information commonly associated with consumer situations, including prices, receipts, refunds, service charges, percentages, and other quantitative information required to justify claims and proposed solutions.

Physical Education contributes by promoting posture, breathing, voice projection, and self-regulation as essential elements of confident, respectful, and assertive communication during face-to-face and telephone interactions.

Through these interdisciplinary connections, English becomes a means to communicate assertively, defend consumer rights responsibly, negotiate solutions respectfully, and participate confidently in everyday interactions that require informed decision-making and effective communication.

PROGRAMA PILOTO

Specific competency	Assessment indicators
SC.EFL4.8. Narration of surprising, unexpected, or unusual situations through personal and fictional stories to share experiences with different audiences, fostering curiosity and attention to everyday events.CC, CSE, CCCC.	I.EFL.4.8.1. Narrates a surprising or unusual situation using the simple past and past continuous, organizing the account with a clear beginning, middle, and end. I.EFL.4.8.2. Uses at least three narrative devices (time markers, connectors of contrast or consequence, and descriptive adjectives) to engage the audience. I.EFL.4.8.3. Shares the narration with a mixed audience (peers and a guest), adjusting volume and pacing to maintain listeners' attention.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.2.d.2. Opening, closing, and management formulas in formal and informal interviews: self-introductions, requests for clarification, reformulations, and leave-takings. EFL.4.2.d.6. Oral narrative resources in English: sequence connectors, time markers, and formulas for personal and fictional accounts. EFL.4.1.d.20. Word stress in vocabulary: stressed syllables in two-syllable nouns and verbs, and stress shift driven by grammatical function. EFL.4.1.d.22. Rhythm and timing in English: English as a stress-timed language, and rhythmic patterns in statements and questions. EFL.4.1.d.32. Listening comprehension strategies: contextual anticipation, selective listening, keyword identification, and comprehension checks.	EFL.4.2.p.5. Narrates family, personal, or fictional experiences using past tenses, time markers, and appropriate sequence connectors. EFL.4.2.p.9. Improvises short oral interactions based on images, unexpected situations, and role plays, exploring English creatively.	EFL.4.4.a.15. Accepts error as part of the learning process and revises their own production with a willingness to improve. EFL.4.2.a.22. Enjoys creative improvisation and play with language as ways of exploring English with confidence. EFL.4.4.a.24. Recognizes writing and narration as ways of constructing identity and contributing to the community's collective memory.

PROGRAMA PILOTO

Methodological Guidelines

This competency invites learners to transform personal and fictional experiences into engaging oral narratives in English, using voice to help listeners experience unexpected events rather than simply hear about them. Through stories drawn from everyday life in Ecuador and other English-speaking contexts, learners discover how pauses, changes in pace, intensity, and intonation contribute to meaning and make storytelling more vivid and authentic.

The pedagogical focus is to develop storytelling as a communicative craft in which prosody supports meaning. Learners practice using their voices intentionally to create suspense, emphasize important moments, and communicate resolution without relying on exaggerated performance. When stories involve emergencies or unexpected situations, learners also begin to build a practical repertoire of English vocabulary that allows them to describe events clearly and communicate the type of help required.

The methodology is based on Project-Based Learning (PBL), enriched through dialogic, inquiry-based, and oral-tradition approaches. The recurring product is The Surprising Stories Studio: A Live and Recorded Anthology of Unexpected Moments Told in English, where learners create short oral narratives, compile a recorded anthology, and develop a companion of narrative and prosodic strategies that can be shared with other classrooms.

Teams work in rotating roles, including teller, prosody coach, vocabulary keeper, audience reader, and studio archivist. Roles rotate throughout the project so that every learner develops both storytelling skills and the ability to provide constructive feedback on oral expression.

PROGRAMA PILOTO

Interdisciplinary Connections

This competency connects English learning with Language and Literature, Social Studies, Natural Sciences, Cultural and Artistic Education, Mathematics, and Physical Education through the oral narration of personal and fictional stories. By telling unexpected events using appropriate vocabulary, narrative structure, and prosodic features such as pauses, pace, and intonation, learners strengthen their oral communication skills while developing expressive, reflective, and creative uses of language.

Language and Literature provides the central context through the study of narrative structure, personal recounts, and storytelling techniques, helping learners organize events coherently while using pacing, suspense, and closure to engage an audience.

Social Studies contributes through stories drawn from different communities and cultural contexts, encouraging learners to recognize how personal experiences, collective memory, and everyday events reflect the diversity of societies in Ecuador and the wider English-speaking world.

Natural Sciences is integrated when narratives include natural phenomena or emergency situations, promoting the accurate use of English vocabulary related to weather events, natural hazards, accidents, and appropriate community responses.

Cultural and Artistic Education connects through the expressive use of voice, prosody, and oral storytelling traditions, encouraging learners to recognize how rhythm, intonation, and oral performance contribute to meaning while distinguishing storytelling from theatrical performance.

Mathematics supports the organization of oral narratives through the use of sequencing, duration, pacing, and time expressions, enabling learners to structure events clearly and communicate them effectively.

Physical Education contributes by promoting body awareness, breathing, posture, and voice projection as essential elements for confident and effective oral storytelling.

Through these interdisciplinary connections, English becomes a means to narrate experiences, communicate unexpected events with clarity and expression, use language creatively, and engage audiences through meaningful oral communication.

PROGRAMA PILOTO

PROGRAMA PILOTO

Specific competency	Assessment indicators
SC.EFL4.9. Development of multiple perspectives through comparative reading of short articles from general-interest magazines in different contexts, identifying the topic, viewpoints, and supporting ideas to understand how issues are experienced differently across communities. CC, CAEC, CCCC.	I.EFL.4.9.1. Identifies the topic, the main perspective, and at least two supporting examples in a short magazine article set in a context such as the Philippines, Kenya, or Vietnam. I.EFL.4.9.2. Compares two articles on a similar issue from different communities, identifying at least two ways the topic is experienced differently. I.EFL.4.9.3. Explains in two or three sentences why understanding diverse viewpoints is valuable, linking the reading to a personal or community experience.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.3.d.7. Written informational and outreach genres: magazine articles, informational texts, bulletins, and community announcements. EFL.4.4.d.18. Connectors and discourse markers: contrast (however, although), cause (because, since, due to), consequence (therefore, as a result), and addition (in addition, furthermore). EFL.4.3.d.26. Diversity of cultural traditions and ways of life in communities across Asia, Africa, the Pacific, and the Americas: celebrations, foods, and forms of organization. EFL.4.3.d.31. Linguistic mediation: strategies for reformulating, paraphrasing, and simplifying information across languages or for different audiences. EFL.4.3.d.33. Reading comprehension strategies: skimming and scanning, recognition of text structure, and basic inference.	EFL.4.1.p.2. Distinguishes perspectives, voices, and approaches in short audiovisual reports on the same event, recognizing differences in how the information is presented. EFL.4.2.p.14. Compares two texts, sources, or perspectives on the same topic orally, citing evidence to point out similarities and differences. EFL.4.3.p.16. Reads general-interest magazine articles, identifying the topic, the author's perspectives, and the examples that support the ideas. EFL.4.3.p.22. Summarizes informational or literary texts in English in a short paragraph, capturing the essential ideas and using one's own words. EFL.4.4.p.27. Writes summaries and personal opinions about television content, series, and online materials, expressing informed points of view. EFL.4.4.p.36. Paraphrases and reformulates, orally or in writing, information read or heard in English from another language of the classroom or the community. EFL.4.2.p.45. Compares and describe natural environments, communities, and ways of life from different contexts of the world using connected descriptions.	EFL.4.2.a.4. Shows curiosity about ways of life, traditions, and ways of organizing knowledge in different communities of the world. EFL.4.2.a.6. Is willing to revise their own perspectives when encountering viewpoints different from their own. EFL.4.3.a.7. Shows interest in exploring a variety of English text genres, including articles, biographies, narratives, infographics, and literary texts. EFL.4.3.a.11. Acts as a mediator between languages, people, or perspectives, facilitating mutual understanding in the classroom.

PROGRAMA PILOTO

Methodological Guidelines

To develop this competency, the learning situation invites adolescents to read and compare short English-language articles on topics connected to their everyday lives, such as local community events, public services, environmental initiatives, or youth activities. Similar articles from different English-speaking communities allow learners to discover how the same topic is experienced and presented from different perspectives. The learning situation is guided by a central question: How can we compare different English-language articles on the same topic, understand the persapectives they present, and build our own informed opinion while remaining open to revising it?

The pedagogical horizon is to develop reflective readers who build opinions through evidence rather than immediate reactions. Learners compare perspectives, distinguish facts from opinions, recognize supporting evidence, and express their own viewpoints while understanding that opinions can change when new information becomes available. The classroom values curiosity, respectful dialogue, and the willingness to reconsider ideas.

The methodology that best supports this competency is Project-Based Learning (PBL), enriched by inquiry-based learning, comparative reading, dialogic discussion, and collaborative analysis. The recurring product is The Wide-View Reading Room: A Curated Collection of Comparative Reading Files, in which teams analyze two or three English-language articles on the same topic, compare perspectives, evaluate the evidence presented, and produce a brief evidence-based position statement. These files are compiled into a classroom reading archive that other students can consult.

Teams work in rotating roles throughout the project. The topic identifier identifies the central topic, audience, and purpose of each article. The perspective mapper compares viewpoints across texts, identifying similarities and differences. The evidence keeper distinguishes facts from opinions and evaluates the supporting examples used in each article. The stance writer prepares the group's evidence-based position statement, explaining how their opinion could change if new evidence emerged. Finally, the reading-room archivist organizes the comparative reading file and prepares it for inclusion in the classroom collection. Roles rotate throughout the project so that every learner experiences both the analytical work of comparing perspectives and the reflective work of constructing an informed personal position.

PROGRAMA PILOTO

Interdisciplinary Connections

This competency connects English learning with Language and Literature, Social Studies, Natural Sciences, Cultural and Artistic Education, Mathematics, and Citizenship Education through the comparative reading of short English-language articles on general-interest topics. By analyzing different perspectives, evaluating supporting evidence, and constructing evidence-based personal viewpoints, learners strengthen critical reading, communication, and reflective thinking while exploring issues that affect communities locally and globally.

Language and Literature provides the main context through the comparative reading of expository texts, the analysis of editorial choices, and the development of paraphrasing, summarizing, and citation skills. Learners strengthen their ability to identify how authors organize information and communicate different perspectives.

Social Studies contributes through the exploration of topics such as urban farming, heritage, transportation, water access, community life, and other social issues presented in the articles. Learners compare how different communities experience similar realities while recognizing the influence of historical, geographical, and cultural contexts.

Natural Sciences is integrated when learners analyze articles related to environmental issues, sustainability, ecosystems, or natural resources, recognizing how scientific information can be communicated from different perspectives while maintaining evidence-based reasoning.

Cultural and Artistic Education connects through the analysis of visual and editorial elements such as photographs, layout, typography, and magazine design, helping learners understand how visual communication contributes to meaning alongside written language.

Mathematics supports the interpretation of numerical information presented in the articles, including prices, distances, percentages, frequencies, and other quantitative data that learners compare and interpret within different contexts.

Citizenship Education contributes by promoting evidence-based opinion formation, respectful dialogue, and the willingness to revise personal viewpoints when new evidence emerges, reinforcing democratic participation and responsible decision-making.

Through these interdisciplinary connections, English becomes a means to compare perspectives, interpret information critically, communicate evidence-based opinions, and participate thoughtfully in discussions about issues that shape contemporary communities.

PROGRAMA PILOTO

Specific competency	Assessment indicators
SC.EFL4.10. Expansion of historical understanding by reading short biographical texts about diverse individuals, using timelines to identify key events and motivations, and appreciating diverse life experiences and trajectories. **CC, CCCC.**	**I.EFL.4.10.1.** Reads a short biographical text about a figure from a country where English is learned or used and identifies key events, dates, and motivations using a timeline. **I.EFL.4.10.2.** Distinguishes between facts and the biographer's interpretations in a short biographical text, providing at least one example of each. **I.EFL.4.10.3.** Explains, in three or four sentences, what the biography reveals about the person's historical context and the challenges they faced.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.3.d.8. Short biographical text: structure (chronology, key events, motivations), use of timelines, and vocabulary of life stages. EFL.4.4.d.13. Past tenses in English: simple past (regular and irregular), past continuous, and the contrast between completed actions and actions in progress. EFL.4.4.d.14. Present perfect simple: used to connect the past and present, with time markers (already, yet, just, ever, never), and to contrast with the simple past. EFL.4.3.d.29. Local narrative and historical heritage: collective memories, events that shape a place's identity, and the diversity of voices and perspectives.	EFL.4.2.p.10. Takes part in interviews with community members, asking follow-up questions, requesting clarification, and thanking participants. EFL.4.3.p.17. Reads short biographical texts about diverse people and identify key events, motivations, and cause-and-effect relationships. EFL.4.4.p.30. Writes a short school report on a local history topic by consulting guided sources, organizing the information, and revising with peers.	EFL.4.1.a.3. Recognizes what each person wishes to share and what they do not, showing discretion and care in interviews and listening circles.

PROGRAMA PILOTO

Methodological Guidelines

To develop this competency, the learning situation invites adolescents to read short English-language biographies of people from different times, places, and communities, discovering how individual lives are shaped by historical, cultural, and social contexts. Through biographies from Ecuador and the wider English-speaking world, learners explore key life events, motivations, and contributions while considering how biographies present particular perspectives rather than complete accounts of a person's life. The learning situation is guided by a central question: How can we read a short biography in English, build a timeline of a person's life, understand the motivations behind their actions, and recognize that every biography reflects particular choices about what to include and how to present it?

The pedagogical horizon is to develop thoughtful readers who understand that biographies are interpretations as well as records of events. Learners distinguish facts from interpretations, identify stated and inferred motivations, and recognize that people's actions should be understood within their historical and cultural contexts. At the B1 level, the emphasis is not on making ethical judgments but on understanding that values and perspectives vary across times and communities while developing respectful, inquiry-based reading habits.

The methodology that best supports this competency is Project-Based Learning (PBL), enriched by inquiry-based learning, biographical reading, and dialogic discussion. The recurring product is The Lives Across Time and Place Reader: A Collection of Biographical Reading Files, in which teams read short biographies, construct timelines of significant events, identify motivations, distinguish facts from interpretations, and formulate open questions for further inquiry. These files are compiled into a classroom reader accompanied by practical strategies for reading biographies critically and thoughtfully.

Teams work in rotating roles throughout the project. The timeline builder organizes key events, dates, and places chronologically. The motivation reader identifies the reasons presented for the person's actions, distinguishing between explicit and inferred motivations. The fact-and-interpretation watcher separates factual information from the biographer's interpretations. The context mapper describes the historical, geographical, and social setting in which the person lived. Finally, the reader-companion archivist compiles the complete biographical file for the classroom collection. Roles rotate throughout the project so that every learner develops the skills of organizing chronological information and critically distinguishing facts from interpretation.

PROGRAMA PILOTO

Interdisciplinary Connections

This competency connects English learning with Language and Literature, Social Studies, Natural Sciences, Cultural and Artistic Education, Mathematics, and Citizenship Education through the reading and analysis of short English-language biographies from different historical periods and cultural contexts. By constructing timelines, exploring motivations, distinguishing facts from interpretations, and formulating open questions, learners develop critical reading, historical understanding, and intercultural awareness while recognizing the complexity of human lives.

Language and Literature provides the primary context through the analysis of biographical texts, narrative structure, and the distinction between factual information and interpretation. Learners strengthen their ability to summarize information, paraphrase ideas, and recognize how biographies are constructed through particular narrative choices.

Social Studies contributes through the exploration of historical periods, social organization, and cultural contexts that shaped the lives of the people studied. Learners compare experiences across communities and historical moments while understanding the importance of interpreting actions within their social and historical context.

Natural Sciences is integrated when biographies feature individuals whose work is connected to the natural world, such as botanists, healers, midwives, fishers, or environmental stewards. These readings promote understanding of ecosystems, traditional knowledge, and the relationship between people and their environment.

Cultural and Artistic Education connects through the appreciation of cultural heritage, traditions, and community memory reflected in biographical narratives, helping learners recognize how individual lives contribute to preserving and shaping cultural identity.

Mathematics supports the construction and interpretation of chronological timelines, the calculation of durations, the comparison of historical periods, and the organization of dates and generations, strengthening learners‘ understanding of time and sequence.

Citizenship Education contributes by encouraging learners to understand historical and cultural contexts before forming conclusions, distinguish between facts and interpretations, and develop respectful inquiry through open questions rather than immediate judgments, fostering thoughtful civic reasoning and intercultural understanding.

Through these interdisciplinary connections, English becomes a means to explore human experiences across time and cultures, interpret biographies critically, understand historical perspectives, and engage thoughtfully with the diversity and complexity of people’s lives.

Specific competency	Assessment indicators
SC.EFL4.11. Reading informational texts on science, culture, and everyday topics by predicting, identifying main and supporting ideas, and summarizing to organize and share information that deepens understanding of the world.CC, CMCT, CD.	I.EFL.4.11.1. Uses skimming and scanning strategies to identify the main idea and at least three supporting details in an informational text on a science, culture, or everyday-life topic. I.EFL.4.11.2. Summarizes the informational text in a short paragraph (4–6 sentences) using the student's own words and appropriate academic vocabulary. I.EFL.4.11.3. Identifies the text structure (e.g., cause-effect, compare-contrast, problem-solution) and explains how it organizes the information.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.3.d.7. Written informational and outreach genres: magazine articles, informational texts, bulletins, and community announcements. EFL.4.4.d.17. Simple passive voice: simple present and simple past in the passive, used in informational and science-outreach texts. EFL.4.4.d.18. Connectors and discourse markers: contrast (however, although), cause (because, since, due to), consequence (therefore, as a result), and addition (in addition, furthermore). EFL.4.3.d.33. Reading comprehension strategies: skimming and scanning, recognition of text structure, and basic inference. EFL.4.4.d.35. Learning-to-learn strategies: use of digital resources and dictionaries to expand lexis, self-assessment, and reflection on the learning process.	EFL.4.2.p.13. Uses listening circles to share concerns, experiences, and possible solutions with peers, taking turns speaking. EFL.4.3.p.16. Reads general-interest magazine articles, identifying the topic, the author's perspectives, and the examples that support the ideas. EFL.4.3.p.18. Predicts the content of informational texts based on the title, images, and subtitles, and identify the main idea and supporting ideas. EFL.4.3.p.22. Summarizes informational or literary texts in English in a short paragraph, capturing the essential ideas and using one's own words. EFL.4.4.p.35. Produces short texts that combine information from two or three sources, organize the data, and cite the sources in a basic way. EFL.4.1.p.37. Summarizes in English texts or conversations, conveying the main ideas to a new audience. EFL.4.4.p.39. Uses bilingual and monolingual online dictionaries to expand vocabulary, verify the use of new words in context, and record them for later use. EFL.4.4.p.48. Reflects collectively on the learning processes at the close of a unit, sharing what was learned and what students still wish to explore.	EFL.4.3.a.7. Shows interest in exploring a variety of English text genres, including articles, biographies, narratives, infographics, and literary texts. EFL.4.3.a.9. Is willing to compare and question information from different sources, recognizing that not everything written or published is equally reliable.

PROGRAMA PILOTO

Methodological Guidelines

To develop this competency, the learning situation invites adolescents to read short English-language informational texts on science, culture, and everyday life from Ecuador and the wider English-speaking world. Through texts from different communities, learners recognize that knowledge can be constructed and communicated in different ways while developing strategies to anticipate content, identify main ideas, summarize information, and consider the source. The learning situation is guided by the question: How can we read short informational texts in English, identify their main ideas, summarize information accurately, and recognize that science, culture, and everyday life can be understood from different perspectives?

The pedagogical horizon is to develop critical readers who recognize that scientific knowledge includes observation, comparison, inference, and communication in diverse cultural contexts, and that culture is expressed through both visible practices and the knowledge, traditions, and values that sustain them. Learners also understand that everyday life varies across communities and that informational texts should be read by considering their purpose, source, and main message. Contemporary issues are approached through accessible B1 texts, emphasizing informed comprehension rather than debate.

The methodology that best supports this competency is Project-Based Learning (PBL), enriched by inquiry-based reading and dialogic learning. The recurring product is The Many Ways of Knowing Reader: A Collection of Informational Reading Files, in which teams prepare anticipation cards, identify main ideas and supporting details, write summaries in their own words, and evaluate the source of each text. These reading files are compiled into a classroom reader accompanied by strategies for skimming, scanning, identifying text structure, summarizing, and recognizing reliable sources.

Teams work in rotating roles throughout the project. The anticipation reader predicts the topic and main idea before reading. The main-idea mapper identifies the central idea and supporting details. The structure watcher recognizes how the information is organized. The summary writer prepares a concise summary using their own words. Finally, the source archivist records information about the author, organization, publication date, and source while considering its reliability. Roles rotate so that every learner develops the skills of identifying main ideas and producing clear, accurate summaries.

PROGRAMA PILOTO

Interdisciplinary Connections

This competency connects English learning with Natural Sciences, Social Studies, Language and Literature, Mathematics, and Cultural and Artistic Education through the reading of short informational texts on science, culture, and everyday life from different communities. By anticipating content, identifying main ideas, summarizing information, and considering the source of a text, learners strengthen reading comprehension while recognizing that knowledge and everyday experiences can be presented from multiple perspectives.

Natural Sciences provides the primary context through informational texts about ecosystems, biodiversity, health, pollination, water cycles, seasonal changes, and other scientific topics. Learners develop scientific literacy by recognizing observation, comparison, inference, and communication as essential ways of constructing and sharing scientific knowledge.

Social Studies contributes through the exploration of communities, regions, cultural practices, and everyday life across different contexts. Learners recognize that culture is expressed through both tangible products and the traditions, knowledge, and values that sustain them, fostering intercultural understanding and respect for diverse ways of living.

Language and Literature supports the analysis of expository text structures, the identification of main ideas and supporting details, summarizing information in learners‘ own words, and the appropriate recognition of authorship and sources.

Mathematics contributes through the interpretation of graphs, tables, percentages, averages, and other numerical information commonly found in informational texts, strengthening learners‘ ability to understand and communicate data accurately.

Cultural and Artistic Education connects through informational texts that explore crafts, traditions, ceremonies, and other cultural expressions, helping learners appreciate how cultural knowledge is transmitted through both practices and the communities that preserve them.

Through these interdisciplinary connections, English becomes a means to access, interpret, and communicate knowledge from multiple disciplines while developing critical reading skills, intercultural awareness, and an informed understanding of science, culture, and everyday life.

PROGRAMA PILOTO

Specific competency	Assessment indicators
SC.EFL4.12. Comprehending infographics about machines, tools, and everyday devices by interpreting images, labels, data, and sequences to explain how objects function, recognizing technological knowledge as part of daily life. CC, CMCT, CIT.	I.EFL.4.12.1. Reads an infographic about a common device or tool (e.g., a water filter, a solar panel, a hand loom) and explains how it works by interpreting information in images, labels, and sequences. I.EFL.4.12.2. Identifies and names the key parts, steps, or data in the infographic, using technical vocabulary accurately. I.EFL.4.12.3. Connects the device or tool described to everyday life by providing one example of its use in a community context they know or have read about.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.3.d.9. Infographics and multimodal texts: interpretation of images, labels, simple statistics, and step sequences. EFL.4.4.d.17. Simple passive voice: simple present and simple past in the passive, used in informational and science-outreach texts. EFL.4.4.d.36. Vocabulary by semantic fields: family and relationships; health and well-being; technology and media; the environment; work; and rights.	EFL.4.1.p.4. Follows sequences of oral instructions and short videos to complete tasks, taking notes using keywords and checking comprehension. EFL.4.2.p.6. Describes people, objects, places, and community processes with concrete details and comparisons. EFL.4.3.p.18. Predicts the content of informational texts based on the title, images, and subtitles, and identify the main idea and supporting ideas. EFL.4.3.p.19. Interprets infographics: images, labels, numerical data, step sequences, and relationships among parts of an object or process. EFL.4.4.p.28. Drafts numbered, sequenced instructions for using academic and classroom materials, with time connectors and imperatives. EFL.4.1.p.38. Relies on images, diagrams, gestures, and visual supports to sustain comprehension and production in English when vocabulary is insufficient.	EFL.4.2.a.10. Cooperates with classmates on group tasks, maintains participation, and acknowledges each person's contributions.

PROGRAMA PILOTO

Methodological Guidelines

To develop this competency, the learning situation invites adolescents to read English-language infographics about everyday tools, machines, and devices from Ecuador and the wider English-speaking world. Through multimodal texts, learners identify parts, follow sequences of operation, interpret simple data, and recognize that technology includes both traditional and modern objects. The learning situation is guided by the question: How can we read an English-language infographic about a tool, machine, or device, identify its parts and functions, follow its sequence of operation, interpret its data, and recognize technology as part of everyday life?

The pedagogical horizon is to develop learners who understand technology as a broad human achievement rather than something exclusively digital or modern. Students recognize that everyday objects—from a pencil or hand loom to a solar dryer or smartphone—are technologies designed to solve practical problems. They also learn to read infographics as complete multimodal texts that integrate images, labels, diagrams, data, and sequences, moving confidently between visual and written information while developing precise technical vocabulary.

The methodology that best supports this competency is Project-Based Learning (PBL), enriched by multimodal reading and object-centered inquiry. The recurring product is The Everyday Things Reader: A Small Atlas of Tools, Machines, and Devices, in which teams prepare atlas entries including labeled diagrams, parts-and-functions lists, sequences of operation, brief data notes, and examples of community use. These entries are compiled into a classroom atlas accompanied by strategies for reading diagrams, following procedures, interpreting simple data, and creating labeled diagrams.

Teams work in rotating roles throughout the project. The diagram reader interprets the infographic and identifies its type. The parts-and-labels mapper identifies and labels the components and their functions. The sequence tracker follows and explains the operating process. The data reader interprets measurements and other numerical information. Finally, the community-use scribe describes how the tool or device is used in a particular community. Roles rotate so that every learner develops the skills of identifying parts and understanding operational sequences.

PROGRAMA PILOTO

Interdisciplinary Connections

The interdisciplinary approach connects the reading and production of technical information in English with knowledge from different areas. Through the analysis of infographics, diagrams, and community-based objects, students explore how tools, machines, and everyday technologies relate to scientific, mathematical, cultural, social, and linguistic knowledge.

Natural Sciences. The reading of infographics supports the understanding of simple machines, materials, energy transfers, and basic principles of physics related to everyday solutions, such as levers, pulleys, filters, and heat exchange.

Mathematics. The interpretation of dimensions, ratios, percentages, and proportions in technical descriptions strengthens the use of geometry and arithmetic applied to real objects and processes.

Cultural and Artistic Education. The exploration of workshops and crafts promotes the study of artisanal techniques, traditional designs, and the documentation of crafts as expressions of living technologies.

Social Studies. The analysis of community-use objects highlights the relationship between communities, tools, repairs, and local solutions, recognizing the knowledge of those who maintain and adapt these technologies.

Language and Literature. The activities support the precise naming of parts, the writing of short procedures, and the interaction between everyday language and technical language in both the first language and English.

Overall, the competency promotes connections between English learning and other fields of knowledge through the exploration, description, and communication of technical objects and their cultural and community contexts.

PROGRAMA PILOTO

Specific competency	Assessment indicators
SC.EFL4.13. Expanding cultural knowledge by reading classical narratives in English from diverse traditions, identifying characters, conflicts, settings, and resolutions, and exploring stories that circulate across languages and cultures. CC, CCCC, CAEC.	I.EFL.4.13.1. Identifies characters, conflict, setting, and resolution in a classical narrative using a graphic organizer. I.EFL.4.13.2. Compares the classical text's narrative structure and themes with a narrative tradition familiar to the student, identifying at least two similarities and two differences. I.EFL.4.13.3. Explains, in three or four sentences, why stories travel across languages and cultures, drawing on specific details from the narrative read.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.4.d.14. Present perfect simple: used to connect the past and present, with time markers (already, yet, just, ever, never), and to contrast with the simple past. EFL.4.3.d.26. Diversity of cultural traditions and ways of life in communities across Asia, Africa, the Pacific, and the Americas: celebrations, foods, and forms of organization. EFL.4.3.d.29. Local narrative and historical heritage: collective memories, events that shape a place's identity, and the diversity of voices and perspectives. EFL.4.3.d.33. Reading comprehension strategies: skimming and scanning, recognition of text structure, and basic inference.	EFL.4.2.p.14. Compares two texts, sources, or perspectives on the same topic orally, citing evidence to point out similarities and differences. EFL.4.3.p.20. Reads classical narratives in English by identifying characters, conflict, setting, and resolution, and compare them with the students' own narrative traditions. EFL.4.3.p.40. Identifies grammatical patterns in texts that have been read and use them as models for the students' own oral and written production. EFL.4.3.p.42. Contrasts English with languages known to identify similarities and differences that facilitate comprehension and production. EFL.4.2.p.45. Compares and describe natural environments, communities, and ways of life from different contexts of the world using connected descriptions.	EFL.4.3.a.7. Shows interest in exploring a variety of English text genres, including articles, biographies, narratives, infographics, and literary texts. EFL.4.3.a.21. Appreciates classical narratives and the literary traditions of the world as expressions of people's creativity and memory. EFL.4.3.a.23. Values the artistic and cultural production of different communities of the world with aesthetic openness and respect for the diversity of forms.

PROGRAMA PILOTO

Methodological Guidelines

This competency should be developed through Project-Based Learning (PBL), supported by comparative literary reading and intercultural dialogue. The approach encourages adolescents to explore classical narratives from diverse traditions, reading them in English while identifying characters, conflicts, settings, and resolutions; comparing them with stories from their own cultural backgrounds; and reflecting on how narratives travel across languages, communities, and generations.

The learning process can be organized around the project "The Travelling Stories Reader: A Small Atlas of Classical Narratives from Many Traditions Read in English, Compared with Stories We Already Carry, and Returned to the Classroom." Through this project, students create atlas entries that include a brief presentation of the tradition, a map of characters and conflicts, a comparative note with a story they already know, and a reflection on the circulation and continuity of narratives.

Collaborative work can be structured through rotating roles: tradition presenter, who introduces the community of origin and the languages connected to the story; story mapper, who organizes characters, conflicts, settings, and resolutions; comparative reader, who establishes connections between traditions and writes comparative reflections; circulation tracker, who explores how stories have been preserved, interrupted, and rediscovered; and sensitivity reader, who identifies historical stereotypes and supports respectful reflection on how traditions evolve through rereading.

This approach promotes plurality, intercultural sensitivity, and critical literary appreciation by guiding students to engage with classical narratives with both affection and critical awareness, recognizing their historical contexts and their capacity to continue growing through new interpretations.

PROGRAMA PILOTO

Interdisciplinary Connections

The interdisciplinary approach connects the reading of classical narratives in English with the study of cultural memory, literary analysis, artistic expressions, and citizenship. Through the exploration and comparison of stories from diverse traditions, students understand how narratives preserve community identities, travel across time and places, and continue to evolve through new interpretations.

Social Studies. The study of classical narratives examines how communities preserve memory, how stories circulate through historical processes such as migration, empires, and trade routes, and how societies have selected which narratives are remembered, taught, or set aside.

Language and Literature. The analysis of classical narratives develops the use of literary concepts such as character, conflict, setting, resolution, narrator, point of view, motif, and formula. Students apply these concepts across different traditions while recognizing that literary categories may illuminate some narrative traditions more effectively than others.

Cultural and Artistic Education. Classical narratives are explored through the visual and musical expressions that have preserved and transmitted them, highlighting that stories exist beyond written language and are connected to artistic practices and cultural representations.

Citizenship Education. The exploration of classical narratives promotes respectful and critical reading of historical stereotypes, encouraging students to recognize processes of inclusion, dignity, and cultural appreciation through careful rereading and attention to both their own traditions and those of others.

Overall, these connections encourage students to approach classical narratives as living cultural expressions that reflect the histories, values, and experiences of diverse communities.

PROGRAMA PILOTO

Specific competency	Assessment indicators
SC.EFL4.14. Collaborative reading of adapted theatre scenes in English through role-reading, interpreting stage directions, and discussing dramatic situations to understand how language, voice, and gesture create meaning in performance. CC, CIT, CAEC.	I.EFL.4.14.1. Reads a role aloud from an adapted theater scene with appropriate pacing, volume, and intonation that reflect the character's emotion and situation. I.EFL.4.14.2. Interprets at least two stage directions in the scene, explaining how they guide the performance and contribute to meaning. I.EFL.4.14.3. Participates respectfully in a group discussion about the dramatic situation, contributing at least one idea about how language, voice, and body work together to create meaning.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.2.d.23. Pronunciation of phonemes that pose difficulty: minimal pairs, long and short vowels, the consonants /θ/, /ð/, /v/, and frequent diphthongs.	EFL.4.3.p.21. Reads adapted scenes from theater plays in English, interpret stage directions, and discuss dramatic situations in small groups. EFL.4.2.p.46. Cooperates with classmates on shared tasks and projects by responsibly distributing roles, resources, and time.	EFL.4.1.a.5. Values the varieties of English and the languages of the place as equally valid resources for communication and learning. EFL.4.2.a.10. Cooperates with classmates on group tasks, maintains participation, and acknowledges each person's contributions. EFL.4.2.a.12. Offers and requests help with confidence, recognizing that collaboration is an essential part of learning. EFL.4.2.a.13. Commits to the classroom's collective agreements and supports peers when they face difficulties during shared work.

PROGRAMA PILOTO

Methodological Guidelines

This competency should be developed through Project-Based Learning (PBL), supported by collaborative dramatic reading and reader-response dialogue. The approach encourages adolescents to engage with adapted theatre scenes in English by reading aloud, interpreting stage directions, understanding dramatic situations, and discussing how voices, gestures, silences, and actions contribute to meaning.

The learning process can be organized around the project "The Travelling Voices Reader: A Small Anthology of Adapted Theatre Scenes from Many English-Language Traditions, Read Aloud Together, with a Public Sharing of the Best-Prepared Scenes." Through this project, students develop a sustained practice of preparing short dramatic scenes for collaborative reading, building vocabulary to discuss drama as a literary genre, and creating a repertoire of scenes that can be read and shared confidently in English.

The teacher selects adapted dramatic texts according to students' linguistic and literary readiness, considering length, register, and content to ensure accessibility. Students focus on understanding the relationship between dialogue and stage directions, recognizing how characters' intentions, conflicts, movements, and interactions shape the dramatic situation.

Collaborative work can be structured through rotating roles: role reader, who interprets a character's lines through voice, pace, and expression; stage-direction reader, who brings attention to gestures, movements, silences, and actions described in the text; discussion leader, who guides post-reading conversations through questions in English and promotes participation; prosody coach, who provides observations about rhythm, pauses, and emphasis; and scene cartographer, who represents characters' entrances, exits, and key objects within the scene.

This approach promotes collaborative literacy, oral communication, and appreciation of drama as a form of shared meaning-making. Through repeated practice, students develop confidence in reading dramatic texts aloud, interpreting literary elements, and expressing their understanding of dramatic situations in English.

PROGRAMA PILOTO

Interdisciplinary Connections

The interdisciplinary approach connects dramatic reading in English with literary analysis, artistic expression, social understanding, and citizenship. Through collaborative exploration of adapted theatre scenes, students recognize drama as a form of communication that combines language, voice, body, cultural expression, and collective participation.

Language and Literature. The study of dramatic texts develops the use of key concepts for dramatic analysis, such as character, conflict, dialogue, monologue, scene, beat, turning point, and stage direction. Students apply these concepts across different dramatic traditions while recognizing that literary categories may illuminate some theatrical forms more effectively than others.

Cultural and Artistic Education. The exploration of dramatic scenes is connected with the visual and musical elements that accompany theatre, such as masks, chorus, lighting, and sound cues. Students understand that drama exists through the interaction of voice, body, performance, and shared spaces.

Social Studies. The reading of adapted scenes supports the understanding of how communities have used theatre to address social issues, celebrate traditions, and preserve historical memories, recognizing drama as a reflection of collective experiences.

Citizenship Education. Collaborative dramatic reading promotes participation, active listening, respect for different voices, and shared responsibility. Students connect the interactions within the dramatic text with the collaborative relationships developed during the reading process.

Overall, these connections highlight drama as a cultural and social practice that strengthens communication, collaboration, and appreciation of diverse forms of expression through English.

PROGRAMA PILOTO

Specific competency	Assessment indicators
SC.EFL4.15. Expanding cultural and literary knowledge by reading English-language texts as models for original story writing and by identifying literary resources and structures to support creative rewriting and personal authorship.CC, CSE, CAEC.	I.EFL.4.15.1. Identifies at least three literary devices (e.g., imagery, repetition, dialogue, setting description) in a model literary text and explains how each contributes to the story. I.EFL.4.15.2. Plans and drafts an original short story inspired by the model text, incorporating at least two of the identified literary devices. I.EFL.4.15.3. Revises a draft story using peer feedback, explaining in one or two sentences the changes made and why.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.3.d.25. Classical narratives in English from different world traditions: genre features, archetypal characters, conflicts, and resolutions. EFL.4.3.d.33. Reading comprehension strategies: skimming and scanning, recognition of text structure, and basic inference.	EFL.4.3.p.20. Reads classical narratives in English by identifying characters, conflict, setting, and resolution, and compare them with the students' own narrative traditions. EFL.4.3.p.22. Summarizes informational or literary texts in English in a short paragraph, capturing the essential ideas and using one's own words. EFL.4.4.p.34. Rewrites and transforms literary texts that have been read, preserving the essential elements and incorporating identified literary resources. EFL.4.3.p.40. Identifies grammatical patterns in texts that have been read and use them as models for the students' own oral and written production.	EFL.4.3.a.8. Enjoys reading as a practice that expands knowledge and imagination, reading beyond what is strictly required. EFL.4.3.a.21. Appreciates classical narratives and the literary traditions of the world as expressions of people's creativity and memory.

PROGRAMA PILOTO

Methodological Guidelines

This competency should be developed through Project-Based Learning (PBL), supported by literary apprenticeship and workshop-based creative writing. The approach encourages adolescents to engage with literary texts in English as writers, observing how authors use images, dialogue, structure, and voice, and applying these elements as scaffolding for the creation of their own original short stories.

The learning process can be organized around the project "The Apprentice Authors: A Small Workshop Anthology of Original Short Stories in English, Written from Many Literary Models and Read at a Public Launch." Through this project, students explore diverse literary models in English, identify writing techniques, draft original stories, exchange structured peer feedback, and revise their texts to develop a personal voice.

The teacher selects literary models that are accessible to students while ensuring diversity of traditions, genres, and authorial voices. Students approach these texts as writers, analyzing how authors construct meaning through language choices, narrative structures, character development, and stylistic resources. The process emphasizes that creativity is developed through practice, observation, experimentation, and revision.

Collaborative work can be structured through rotating roles: reader of models, who guides close reading and identifies how authors use literary techniques; drafter, who develops the group's story draft and contributes original sentences; craft noticer, who records literary devices and writing strategies in a shared craft log; peer responder, who provides structured feedback on another group's draft; and revision keeper, who documents revision decisions and organizes the evolving anthology.

This approach promotes reading and writing as interconnected processes, allowing students to build confidence as emerging authors in English. Through exposure to diverse literary models, collaborative creation, and continuous revision, students develop the ability to express original ideas while constructing their own literary voice.

PROGRAMA PILOTO

Interdisciplinary Connections

The interdisciplinary approach connects creative writing in English with literary analysis, artistic expression, social understanding, and citizenship. Through the creation of original short stories, students explore how language, culture, history, and artistic practices contribute to the development of personal and collective voices.

Language and Literature. The study and production of literary texts develop the use of key concepts for literary analysis, such as image, point of view, scene and summary, opening and closing, characterization, motif, and voice. Students apply these concepts in English while recognizing how literary craft operates across languages.

Cultural and Artistic Education. The creation of short stories is connected with other concise artistic forms, such as photography, songs, short films, and sketches. Students understand that short literary forms belong to a broader family of artistic expressions that communicate meaning through carefully selected elements.

Social Studies. The exploration of literary texts from different regions and traditions encourages students to consider the social and historical contexts in which stories are created. Students recognize that short stories can reflect the experiences, identities, and realities of specific communities and periods.

Citizenship Education. The writing workshop promotes collaboration, respectful dialogue, and responsible feedback. Through sharing and revising their work, students develop listening skills, empathy, and appreciation for different perspectives, connecting the ethics of the workshop with broader practices of communication and participation.

Overall, these connections highlight creative writing as a process that integrates language, culture, artistic expression, and social awareness, allowing students to develop their own voices in English while engaging with diverse human experiences.Overall, these connections highlight drama as a cultural and social practice that strengthens communication, collaboration, and appreciation of diverse forms of expression through English.

PROGRAMA PILOTO

Specific competency	Assessment indicators
SC.EFL4.16. Participation in English-language verbal games through exchanges of clues, riddles, and wordplay to explore sound, meaning, and figurative language, recognizing language as a source of creativity and enjoyment. CC, CCCC, CAEC.	I.EFL.4.16.1. Participates in short word games, riddles, and verbal puzzles in English, using clues and figurative language to guess or produce answers. I.EFL.4.16.2. Creates an original riddle or wordplay item in English, using at least one example of figurative language (e.g., metaphor, personification, or homophonic play). I.EFL.4.16.3. Identifies and explains one example of how sound, meaning, and creativity interact in a verbal game, linking it to the playful potential of language.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.1.d.20. Word stress in vocabulary: stressed syllables in two-syllable nouns and verbs, and stress shift driven by grammatical function. EFL.4.1.d.22. Rhythm and timing in English: English as a stress-timed language, and rhythmic patterns in statements and questions. EFL.4.3.d.25. Classical narratives in English from different world traditions: genre features, archetypal characters, conflicts, and resolutions.	EFL.4.2.p.9. Improvises short oral interactions based on images, unexpected situations, and role plays, exploring English creatively. EFL.4.3.p.20. Reads classical narratives in English by identifying characters, conflict, setting, and resolution, and compare them with the students' own narrative traditions. EFL.4.3.p.21. Reads adapted scenes from theater plays in English, interpret stage directions, and discuss dramatic situations in small groups. EFL.4.4.p.34. Rewrites and transforms literary texts that have been read, preserving the essential elements and incorporating identified literary resources. EFL.4.3.p.42. Contrasts English with languages known to identify similarities and differences that facilitate comprehension and production.	EFL.4.1.a.5. Values the varieties of English and the languages of the place as equally valid resources for communication and learning. EFL.4.3.a.8. Enjoys reading as a practice that expands knowledge and imagination, reading beyond what is strictly required. EFL.4.3.a.21. Appreciates classical narratives and the literary traditions of the world as expressions of people's creativity and memory. EFL.4.2.a.22. Enjoys creative improvisation and play with language as ways of exploring English with confidence.

PROGRAMA PILOTO

PROGRAMA PILOTO

Methodological Guidelines

This competency should be developed through Project-Based Learning (PBL), supported by playful inquiry and workshop-based verbal craft. The approach encourages adolescents to explore verbal games in English, analyzing how riddles, sound puzzles, and figurative language create meaning through clues, sounds, images, and word choices.

The learning process can be organized around the project "The Riddlers' Circle: A Small Workshop of Literary Enigmas, Sound Puzzles, and Figurative Language Games in English, Performed at a Public Round." Through this project, students examine models of verbal games, identify creative techniques, develop their own riddles and language games, exchange feedback, and rehearse their oral presentation.

Collaborative work can be structured through rotating roles: enigma reader, who analyzes how clues are constructed; riddle drafter, who creates original pieces; sound noticer, who explores pronunciation, rhyme, stress, and intonation; figurative-language keeper, who identifies and develops metaphors, similes, and personifications; and performance host, who organizes the final presentation.

This approach promotes creativity, linguistic awareness, and confidence in using English by allowing students to experiment with sounds, meanings, and literary devices through collaborative and playful language practices.

Interdisciplinary Connections

The interdisciplinary approach connects verbal games in English with literary analysis, artistic expression, social awareness, and citizenship. Through riddles, sound puzzles, and figurative-language activities, students explore how language, culture, and creativity interact to communicate ideas in playful and meaningful ways.

Language and Literature. The study of verbal games develops the use of concepts such as clue, twist, reveal, homophone, pun, rebus, metaphor, simile, personification, kenning, and proverb. Students apply these concepts in English while recognizing connections between different language traditions, such as the relationship between the adivinanza and the English riddle.

Cultural and Artistic Education. Verbal games are explored alongside other short artistic forms, such as songs, cartoons, and visual compositions, allowing students to understand how different arts use concise elements to create meaning and impact.

Social Studies. The exploration of verbal games from different regions highlights their cultural and historical contexts, helping students recognize how language games reflect the experiences, traditions, and environments of the communities where they emerge.

Citizenship Education. The collaborative practice of creating and sharing riddles promotes respect, active listening, and appreciation of others' ideas. Students learn to value both creative solutions and the process of participation, connecting the ethics of the workshop with respectful public communication.

Overall, these connections position verbal play as a creative and cultural practice that strengthens language awareness, collaboration, and appreciation of diverse forms of expression in English.

PROGRAMA PILOTO

Specific competency	Assessment indicators
SC.EFL4.17. Collective action to create prevention texts on natural and human risks through scripts, posters, or informational messages to promote safety and well-being among peers and families, recognizing shared responsibility for risk prevention. CC, CCCC, CMCT.	I.EFL.4.17.1. Identifies at least two natural or human risks affecting a community and drafts a brief prevention message for a specific audience. I.EFL.4.17.2. Produces a brief prevention text (poster, script, or informational message) using imperative forms, conditional type 1, and appropriate safety vocabulary. I.EFL.4.17.3. Explains how individual and collective actions contribute to safety, providing at least one concrete example from the produced text.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.4.d.11. Instructional and prevention texts: use of the imperative, time-sequence connectors, numbered steps, and cautionary register. EFL.4.4.d.15. Ways of talking about the future in English: will (predictions and spontaneous decisions), be going to (plans), and the present continuous with a future meaning. EFL.4.4.d.17. Simple passive voice: simple present and simple past in the passive, used in informational and science-outreach texts. EFL.4.2.d.28. Active citizenship and collective responsibility: participation in community decisions, school campaigns, and actions for the common good. EFL.4.4.d.34. Planning for written production: defining purpose and audience, organizing ideas in an outline, drafting, and revising.	EFL.4.3.p.18. Predicts the content of informational texts based on the title, images, and subtitles, and identify the main idea and supporting ideas. EFL.4.4.p.23. Drafts outlines and idea maps before writing to plan the text's content, order, and audience. EFL.4.4.p.24. Writes short prevention texts (posters, scripts, informational messages) about natural and human risks, using the imperative and the first conditional. EFL.4.4.p.29. Prepares scripts and visual aids for presentations on digital risks, structuring the information and anticipating audience questions. EFL.4.4.p.33. Revises and corrects one's own drafts and those of peers using criteria of cohesion, coherence, lexical precision, and spelling. EFL.4.2.p.43. Describes practices of care for the body, health, and emotional well-being in short presentations, using appropriate vocabulary. EFL.4.2.p.47. Plans a campaign, project, or presentation with peers by defining its purpose, audience, stages, and materials.	EFL.4.4.a.14. Takes responsibility for their learning tasks: plans them, meets deadlines, and communicates obstacles in advance. EFL.4.4.a.18. Recognizes and values individual and collective practices for preventing natural and human risks as a shared responsibility. EFL.4.3.a.20. Values the natural environment and the community's practices of care as part of the common heritage that is inherited and passed on.

PROGRAMA PILOTO

Methodological Guidelines

This competency should be developed through Project-Based Learning (PBL), supported by community inquiry and a writing workshop. The approach encourages adolescents to analyze short prevention texts in English, identify the relationship between hazards and human decisions, and create their own messages that provide clear actions and information for their communities.

The learning process can be organized around the project “Decisions Behind the Disaster: A Small Folder of Prevention Texts in English for the Neighborhood — Posters, Scripts, Informational Messages — Prepared, Revised, and Posted Where People Pass.” Through this project, students identify local risks, research the decisions and actions related to them, write prevention texts in English, revise language accuracy, and share their messages in meaningful community spaces.

Collaborative work can be structured through rotating roles: risk researcher, who explores hazards and the human factors connected to them; prevention drafter, who develops the group’s written texts; grammar tuner, who reviews imperatives, conditionals, modals, and connectors; lexis keeper, who organizes key vocabulary related to prevention and safety; and outreach editor, who prepares the final format and presentation of the texts.

This approach promotes critical awareness, linguistic precision, and community responsibility by guiding students to use English as a tool for communicating prevention, care, and informed action.

PROGRAMA PILOTO

Interdisciplinary Connections

The interdisciplinary approach connects prevention writing in English with social awareness, scientific understanding, mathematical reasoning, and citizenship. Through the creation of prevention texts, students explore how language can communicate risks, explain hazards, and promote informed decisions within their communities.

Social Studies. The study of community risks encourages students to explore the historical and social factors behind vulnerable situations, recognizing how decisions related to land use, infrastructure, planning, and maintenance influence the impact of hazards.

Natural Sciences. Students analyze the scientific mechanisms behind different hazards, such as geological, hydrological, biological, and epidemiological processes. This knowledge supports the creation of prevention texts that use accurate technical vocabulary and reliable information.

Mathematics. The use of simple statistics, percentages, ratios, and basic charts helps students incorporate evidence into prevention messages and understand how data can strengthen communication and decision-making.

Citizenship Education. Students reflect on collective responsibility, the right to a safe environment, and the role of communication in protecting communities. Through writing for real audiences, they develop awareness of how language can contribute to care, participation, and social responsibility.

Overall, these connections position English as a tool for understanding risks, communicating prevention strategies, and encouraging responsible action within the community.

PROGRAMA PILOTO

Specific competency	Assessment indicators
SC.EFL4.18. Dissemination of cultural activities in the school and community through bulletins, announcements, or promotional texts to inform and invite participation, recognizing the importance of cultural life in community development.CC, CCCC, CAEC.	I.EFL.4.18.1. Drafts a short bulletin or announcement about a real school or community cultural activity, including the key information (who, what, when, where, why) in an organized format. I.EFL.4.18.2. Uses appropriate promotional language (e.g., invitations, calls to action, descriptive adjectives) to encourage participation in the activity. I.EFL.4.18.3. Revises the text for accuracy and clarity, applying at least two corrections suggested during a peer review session.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.3.d.7. Written informational and outreach genres: magazine articles, informational texts, bulletins, and community announcements. EFL.4.4.d.34. Planning for written production: defining purpose and audience, organizing ideas in an outline, drafting, and revising.	EFL.4.2.p.6. Describes people, objects, places, and community processes with concrete details and comparisons. EFL.4.4.p.23. Drafts outlines and idea maps before writing to plan the text's content, order, and audience. EFL.4.4.p.25. Writes bulletins, announcements, and short promotional texts to communicate cultural and school activities in an organized manner. EFL.4.4.p.31. Develops informational materials for school campaigns on the rights of young people, such as posters, brochures, or clear, well-organized messages. EFL.4.4.p.33. Revises and corrects one's own drafts and those of peers using criteria of cohesion, coherence, lexical precision, and spelling. EFL.4.1.p.37. Summarizes in English texts or conversations, conveying the main ideas to a new audience.	EFL.4.3.a.23. Values the artistic and cultural production of different communities of the world with aesthetic openness and respect for the diversity of forms.

PROGRAMA PILOTO

Methodological Guidelines

This competency should be developed through Project-Based Learning (PBL), supported by community inquiry and a writing workshop. The approach encourages adolescents to create cultural bulletins and announcements in English that present culture as a living and active practice, focusing on real people, events, and community participation rather than simplified representations.

The learning process can be organized around the project "The Bulletin Board: A Folder of Short Promotional Texts in English for the School and the Neighborhood — Bulletins, Announcements, and Invitations Prepared, Posted, and Followed Up on the Day." Through this project, students identify cultural activities, gather relevant information, write promotional texts in English, revise them, and share them with authentic audiences.

Students develop key elements of promotional writing by practicing how to inform, invite, describe, and acknowledge the people behind cultural activities. They also explore different varieties of written English, using American English as the working norm while recognizing other English varieties as valid forms of communication.

Collaborative work can be structured through rotating roles: event scout, who gathers information about cultural activities; bulletin drafter, who develops the promotional text; grammar editor, who reviews language accuracy and conventions; lexis curator, who organizes vocabulary and expressions; and layout host, who prepares the final format and monitors audience engagement.

This approach promotes authentic communication, cultural appreciation, and purposeful writing by positioning English as a tool for connecting communities and inviting participation in real cultural experiences.

PROGRAMA PILOTO

Interdisciplinary Connections
The interdisciplinary approach connects promotional writing in English with literary communication, cultural expression, social awareness, and citizenship. Through the creation of bulletins and announcements, students explore how language can represent cultural practices, recognize their creators, and encourage meaningful participation. Language and Literature. The study of promotional texts develops the use of concepts such as headline, lead, body, call to action, byline, dateline, and caption. Students apply these conventions in English while recognizing their relationship with similar structures in Spanish-language bulletins and announcements. Cultural and Artistic Education. Students explore cultural activities and creative practices from their school and communities, developing promotional texts in dialogue with the people who create and participate in these practices. Social Studies. The creation of cultural bulletins encourages students to investigate the history and development of local institutions, groups, and initiatives, recognizing that cultural life is built through the contributions of specific people and communities. Citizenship Education. Students reflect on cultural participation as a right and understand that responsible communication requires representing communities respectfully, avoiding stereotypes, and creating invitations that recognize audiences as active participants. Overall, these connections position English as a tool for promoting cultural engagement, strengthening community ties, and communicating authentic experiences.

Specific competency	Assessment indicators
SC.EFL4.19. Recommendation of academic information through brief website reviews, using explicit criteria to guide peers in identifying reliable sources and evaluating the quality and credibility of online information. CC, CD.	I.EFL.4.19.1. Evaluates a website using at least three explicit criteria (authorship, date, purpose, accuracy, and relevance) and writes a short review that applies each criterion to the site. I.EFL.4.19.2. Compares two websites on the same topic and recommends one to peers, justifying the recommendation with evidence from the evaluation criteria. I.EFL.4.19.3. Identifies at least one feature that makes a source unreliable and explains it in two or three connected sentences using appropriate critical vocabulary.

PROGRAMA PILOTO

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.3.d.10. Short reviews and assessments: structure (description + opinion + recommendation), evaluative vocabulary, and explicit criteria. EFL.4.3.d.30. Media and informational perspectives: how different outlets present the same event, and the notions of source, bias, and credibility. EFL.4.4.d.35. Learning-to-learn strategies: use of digital resources and dictionaries to expand lexis, self-assessment, and reflection on the learning process.	EFL.4.2.p.15. Expresses agreement and disagreement respectfully and propose alternatives in classroom and community debates and discussions. EFL.4.4.p.26. Writes short reviews of websites and academic materials using explicit criteria (authorship, date, purpose, reliability). EFL.4.4.p.35. Produces short texts that combine information from two or three sources, organize the data, and cite the sources in a basic way. EFL.4.4.p.39. Uses bilingual and monolingual online dictionaries to expand vocabulary, verify the use of new words in context, and record them for later use. EFL.4.4.p.41. Sets short language-learning goals, record progress, and reflect on the strategies that were used.	EFL.4.3.a.9. Is willing to compare and question information from different sources, recognizing that not everything written or published is equally reliable. EFL.4.4.a.17. Commits to ethical practices in the use of digital information: cites sources, asks for permission, and acknowledges the authorship of the materials they use.

PROGRAMA PILOTO

Methodological Guidelines

This competency should be developed through Project-Based Learning (PBL), supported by inquiry-based reading and writing workshops. The approach encourages adolescents to evaluate academic websites in English by applying clear criteria, identifying reliable information, and writing reviews that help others make informed decisions about digital sources.

The learning process can be organized around the project "The Reader's Compass: A Folder of Short Reviews of Academic Websites in English, with Side-by-Side Comparisons, Recommendations, and Warnings, Written for the Next Class to Use." Through this project, students investigate a question from another subject area, evaluate English-language sources, compare websites, and produce written reviews with justified recommendations.

Students apply evaluation criteria related to authorship, date, purpose, accuracy, and relevance, while learning to distinguish between the reliability of a website and the quality of a specific text. The process promotes a gradual transition from relying on teacher-selected sources toward developing independent digital information literacy.

Collaborative work can be structured through rotating roles: search strategist, who develops search questions and keeps a search record; criteria officer, who guides the evaluation process; site-and-text reader, who analyzes the website and specific articles separately; comparison editor, who prepares comparisons and recommendations; and autonomy coach, who ensures that reviews are useful for independent readers.

This approach strengthens critical thinking, research skills, and responsible use of information by positioning English as a tool for accessing, evaluating, and communicating knowledge from diverse digital sources.

PROGRAMA PILOTO

Interdisciplinary Connections
The interdisciplinary approach connects critical reading of online sources in English with language analysis, research in other fields, citizenship, and visual communication. Through the evaluation of digital information, students develop the ability to assess sources, communicate recommendations, and make responsible decisions about the information they use. Language and Literature. Students develop vocabulary related to source evaluation, such as authorship, byline, citation, primary source, and peer review. They apply these concepts in English while recognizing their connection with critical reading practices and academic writing. Natural Sciences and Social Studies. Students apply source-evaluation criteria to research questions from other areas of knowledge, creating a reliable bibliography that supports inquiry and academic work in subjects such as biology, history, geography, and physics. Citizenship Education. The evaluation of digital sources promotes reflection on the right to reliable information and the responsibility involved in recommending information to others. Students understand source-checking as a practice connected to informed participation and responsible decision-making. Cultural and Artistic Education. Students analyze visual and editorial elements of digital pages, such as typography, layout, images, and advertising, recognizing that evaluating online information also involves interpreting how design influences credibility and communication. Overall, these connections strengthen digital literacy by integrating language, research, civic responsibility, and visual analysis, allowing students to become more independent and critical users of information.

Specific competency	Assessment indicators
SC.EFL4.20. Response to cultural expressions in television, series, and online content through summaries and personal opinions in English and community languages to participate in discussions and reflect critically on media messages. CC, CD, CAEC.	I.EFL.4.20.1. Writes a summary (5–7 sentences) of a TV program, series episode, or online content piece that captures the main topic and key elements. I.EFL.4.20.2. Expresses a personal opinion about the content, supporting it with at least two reasons and one specific example from the content viewed. I.EFL.4.20.3. Identifies and discusses at least one message conveyed by the content, explaining whether it aligns with or conflicts with the student's values or community experiences.

PROGRAMA PILOTO

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.3.d.10. Short reviews and assessments: structure (description + opinion + recommendation), evaluative vocabulary, and explicit criteria. EFL.4.4.d.18. Connectors and discourse markers: contrast (however, although), cause (because, since, due to), consequence (therefore, as a result), and addition (in addition, furthermore). EFL.4.3.d.30. Media and informational perspectives: how different outlets present the same event, and the notions of source, bias, and credibility. EFL.4.3.d.31. Linguistic mediation: strategies for reformulating, paraphrasing, and simplifying information across languages or for different audiences.	EFL.4.1.p.2. Distinguishes perspectives, voices, and approaches in short audiovisual reports on the same event, recognizing differences in how the information is presented. EFL.4.2.p.8. Expresses opinions and justify them briefly with relevant reasons and examples in classroom conversations and discussions. EFL.4.3.p.16. Reads general-interest magazine articles, identifying the topic, the author's perspectives, and the examples that support the ideas. EFL.4.4.p.26. Writes short reviews of websites and academic materials using explicit criteria (authorship, date, purpose, reliability). EFL.4.4.p.27. Writes summaries and personal opinions about television content, series, and online materials, expressing informed points of view. EFL.4.4.p.32. Writes short opinion paragraphs in English with a claim, reasons, and a supporting example or piece of evidence. EFL.4.4.p.36. Paraphrases and reformulates, orally or in writing, information read or heard in English from another language of the classroom or the community.	EFL.4.2.a.6. Is willing to revise their own perspectives when encountering viewpoints different from their own EFL.4.3.a.11. Acts as a mediator between languages, people, or perspectives, facilitating mutual understanding in the classroom. EFL.4.3.a.23. Values the artistic and cultural production of different communities of the world with aesthetic openness and respect for the diversity of forms.

PROGRAMA PILOTO

Methodological Guidelines

This competency should be developed through Project-Based Learning (PBL), supported by a viewing journal and discussion workshop. The approach encourages adolescents to engage critically with audiovisual content in English by summarizing what they watch, expressing opinions supported by evidence, identifying messages, and considering different perspectives.

The learning process can be organized around the project "The Viewer's Voice: A Folder of Short Summaries, Personal Opinions, and Cross-Cultural Notes in English on Television, Series, and Online Content from Around the World, Written for Peers Who Have Not Yet Watched." Through this project, students explore audiovisual works from diverse cultural origins, write summaries and opinion texts, and create reflections that help peers make informed viewing choices.

Students learn to distinguish between what an audiovisual work shows, what it communicates, and the effect it produces on viewers. They develop strategies to express opinions with clarity, using reasons, examples, and varied language structures beyond basic opinion expressions.

Collaborative work can be structured through rotating roles: summary writer, who describes the content objectively; opinion crafter, who develops supported viewpoints; message reader, who analyzes themes and values; language stylist, who improves the expression of opinions; and cross-cultural notetaker, who compares works from different cultural contexts.

This approach promotes critical viewing, intercultural understanding, and purposeful communication by positioning English as a tool for discussing, interpreting, and sharing perspectives about audiovisual experiences.

PROGRAMA PILOTO

Interdisciplinary Connections

The interdisciplinary approach connects audiovisual analysis in English with literary interpretation, social understanding, citizenship, and artistic expression. Through the exploration of audiovisual works from diverse cultural contexts, students develop the ability to interpret messages, analyze creative choices, and communicate informed opinions.

Language and Literature. Students develop vocabulary for audiovisual analysis, such as pacing, framing, narrative arc, point of view, and subtext. They apply these concepts in English while strengthening their ability to write and communicate more nuanced opinions.

Social Studies. Students examine audiovisual works through historical and social perspectives, identifying the contexts represented, the social issues explored, and the voices that are highlighted or absent. Cross-cultural comparisons help them understand different forms of storytelling around the world.

Citizenship Education. The analysis of audiovisual content promotes media literacy, responsible interpretation, and respectful dialogue. Students reflect on how to disagree with cultural works constructively and support their opinions with evidence.

Cultural and Artistic Education. Students explore the visual and sonic elements of audiovisual language, including framing, music, silence, color, and montage. They recognize that critical viewing involves understanding artistic choices and using specific language to explain what they observe.

Overall, these connections strengthen students' ability to engage critically with audiovisual content, appreciate diverse cultural expressions, and use English to communicate thoughtful perspectives.

PROGRAMA PILOTO

Specific competency	Assessment indicators
SC.EFL4.21. Production of instructional texts for classroom and academic materials, using numbered sequences, imperatives, and temporal connectors to support peers in the effective use of shared resources, recognizing peer learning as part of everyday practice. CC, CIT, CMCT.	I.EFL.4.21.1. Produces a numbered sequence of instructions for using a specific academic or classroom material (e.g., a digital library, a laboratory kit, a shared calendar) using imperatives and temporal connectors. I.EFL.4.21.2. Uses accurate, precise vocabulary related to the material, avoiding vague or ambiguous language. I.EFL.4.21.3. Tests the instructions by having a classmate follow them, then revises at least one step based on the trial to improve clarity or completeness.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.3.d.9. Infographics and multimodal texts: interpretation of images, labels, simple statistics, and step sequences. EFL.4.4.d.11. Instructional and prevention texts: use of the imperative, time-sequence connectors, numbered steps, and cautionary register.	EFL.4.1.p.4. Follows sequences of oral instructions and short videos to complete tasks, taking notes using keywords and checking comprehension. EFL.4.3.p.19. Interprets infographics: images, labels, numerical data, step sequences, and relationships among parts of an object or process. EFL.4.4.p.28. Drafts numbered, sequenced instructions for using academic and classroom materials, with time connectors and imperatives. EFL.4.3.p.40. Identifies grammatical patterns in texts that have been read and use them as models for the students' own oral and written production.	EFL.4.2.a.10. Cooperates with classmates on group tasks, maintains participation, and acknowledges each person's contributions.

PROGRAMA PILOTO

Methodological Guidelines

This competency should be developed through Project-Based Learning (PBL), supported by an instructional-writing workshop and user testing. The approach encourages adolescents to explore academic resources in English, identify their paratextual features, and create clear instructional texts that help other students navigate unfamiliar materials.

The learning process can be organized around the project “Reader’s Maps for Academic English Texts: A Field Collection of Tested Instructional Documents Helping a First-Time Reader Find Their Way Inside an Academic Resource in English.” Through this project, students analyze different academic resources, design instructional guides, test them with real users, revise their texts, and contribute them to a shared school collection.

Students develop awareness of how academic texts are organized through elements such as indexes, glossaries, footnotes, tables, captions, and appendices. They practice writing instructions using clear sequences, imperatives, and temporal connectors, while recognizing that academic conventions may vary across English-speaking contexts.

Collaborative work can be structured through rotating roles: operator, who explores the academic resource and identifies relevant features; scribe, who drafts the instructions; user-tester, who evaluates the guide through real use; paratext namer, who ensures accurate identification of text features; and layout designer, who organizes the final instructional document.

This approach promotes academic autonomy, information literacy, and purposeful writing by positioning English as a tool for accessing, explaining, and sharing knowledge across learning communities.

PROGRAMA PILOTO

Interdisciplinary Connections

The interdisciplinary approach connects academic-text navigation in English with language analysis, scientific and social research, citizenship, and visual communication. Through the creation of instructional maps, students learn to access, interpret, and share academic resources across different fields of knowledge.

Language and Literature. Students develop vocabulary related to paratextual analysis, such as index, glossary, appendix, footnote, running title, text block, layout, and typography. They apply these concepts in English while strengthening their ability to write clear procedural texts.

Natural Sciences. Students explore English-language scientific resources, including encyclopedias, laboratory manuals, and field guides, learning to interpret elements such as captions, tables, and appendices while creating guides that support scientific inquiry.

Social Studies. Students work with historical atlases, reference works, and primary-source collections in English, developing skills to navigate elements such as maps, indexes, and chronological tables for research purposes.

Citizenship Education. The process of creating tested instructional texts promotes reflection on equal access to knowledge. Students recognize that making academic resources understandable for others is a contribution to a more inclusive learning environment.

Cultural and Artistic Education. Students analyze the visual organization of academic texts, recognizing that typography, layout, and page design influence how information is accessed and understood. They also develop awareness that an instructional map combines communication and graphic design.

Overall, these connections position English as a tool for academic independence, equitable access to information, and effective communication across different areas of knowledge.

PROGRAMA PILOTO

Specific competency	Assessment indicators
SC.EFL4.22. Reflection on risks in digital environments through scripts, visual supports, and question-and-answer activities to explain common online risks and propose strategies for safe participation, recognizing shared responsibility for digital well-being. CC, CD, CCCC.	I.EFL.4.22.1. Identifies and explains at least three common online risks (e.g., phishing, cyberbullying, oversharing personal data) in a short presentation using clear, accessible language. I.EFL.4.22.2. Proposes at least two concrete strategies for safe participation in digital spaces, supporting each with a brief explanation of its effectiveness. I.EFL.4.22.3. Responds accurately to at least two questions from the audience during a Q&A session following the presentation, clarifying or expanding on the information shared.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.3.d.9. Infographics and multimodal texts: interpretation of images, labels, simple statistics, and step sequences. EFL.4.4.d.11. Instructional and prevention texts: use of the imperative, time-sequence connectors, numbered steps, and cautionary register. EFL.4.4.d.16. First conditional: structure: If + simple present + will; used to express possible consequences and prevention situations. EFL.4.4.d.35. Learning-to-learn strategies: use of digital resources and dictionaries to expand lexis, self-assessment, and reflection on the learning process.	EFL.4.2.p.7. Presents information orally on an academic or community topic with visual support, organizing ideas clearly. EFL.4.3.p.19. Interprets infographics: images, labels, numerical data, step sequences, and relationships among parts of an object or process. EFL.4.4.p.24. Writes short prevention texts (posters, scripts, informational messages) about natural and human risks, using the imperative and the first conditional. EFL.4.4.p.29. Prepares scripts and visual aids for presentations on digital risks, structuring the information and anticipating audience questions. EFL.4.1.p.38. Relies on images, diagrams, gestures, and visual supports to sustain comprehension and production in English when vocabulary is insufficient. EFL.4.4.p.39. Uses bilingual and monolingual online dictionaries to expand vocabulary, verify the use of new words in context, and record them for later use. EFL.4.4.p.41. Sets short language-learning goals, record progress, and reflect on the strategies that were used.	EFL.4.2.a.12. Offers and requests help with confidence, recognizing that collaboration is an essential part of learning. EFL.4.4.a.17. Commits to ethical practices in the use of digital information: cites sources, asks for permission, and acknowledges the authorship of the materials they use.

PROGRAMA PILOTO

PROGRAMA PILOTO

Methodological Guidelines

Adolescents in EGB Superior already navigate digital environments where communication, learning, entertainment, and risk coexist. This competency invites them to use English to discuss real online situations — such as privacy risks, scams, cyberbullying, misinformation, or AI-generated content — explaining risks, proposing realistic strategies, and answering questions from peers, families, or younger students. The aim is to develop practical digital literacy that promotes awareness, responsibility, and informed participation rather than fear.

The methodology that best fits this competency is Project-Based Learning (PBL), supported by scriptwriting, visual design, and oral communication workshops, organised around the recurring product "Safer Together: A Folder of Short English Scripts, Visual Supports, and Question-and-Answer Notes on Online Risks, Prepared by Adolescents for the School Community." Each cluster selects a digital-risk topic, researches reliable information, prepares a short English script, designs a visual support, rehearses possible questions, and presents the final product to a real audience.

Teams work in rotating roles: risk researcher (collects and verifies information), script writer (drafts the presentation in clear English), visual designer (creates accessible supporting materials), Q&A coach (prepares questions and responses), and language stylist (reviews vocabulary, grammar, and tone). Roles rotate so every adolescent practises both research and communication skills.

Interdisciplinary Connections

The interdisciplinary approach connects digital-safety communication in English with language analysis, scientific understanding, social awareness, citizenship, and visual communication. Through the creation of scripts, visual supports, and community presentations, students learn to identify online risks, communicate strategies for protection, and promote responsible participation in digital environments.

Language and Literature. Students develop vocabulary related to digital safety, including risk, privacy, evidence, advice, responsibility, and online behaviour. They apply rhetorical structures such as hook, explanation, strategy, and call to action, strengthening their ability to write clear advisory and persuasive texts in English.

Natural Sciences. Students explore English-language texts about digital well-being, including the relationship between technology use, sleep, attention, and adolescent health. They recognise that safe digital participation also involves understanding biological and personal well-being.

Social Studies. Students examine how digital platforms influence communication, information flows, and social participation across different contexts. Through comparative texts in English, they explore how communities and countries address issues such as privacy, misinformation, and online regulation.

Citizenship Education. The process of creating digital-safety messages promotes reflection on rights, responsibilities, and collective care in online spaces. Students discuss respectful communication, reporting mechanisms, bystander responsibility, and the importance of creating safer digital communities.

Cultural and Artistic Education. Students analyse the visual design of digital-safety campaigns from different contexts, exploring how images, typography, colours, and composition influence the effectiveness of a message. They recognise that creating accessible visual supports requires both aesthetic decisions and ethical considerations.

Overall, these connections position English as a tool for digital citizenship, critical communication, and responsible participation in contemporary social environments.

PROGRAMA PILOTO

PROGRAMA PILOTO

Specific competency	Assessment indicators
SC.EFL4.23. Development of historical understanding through short reports on local historical topics, using guided research, structured writing, and peer review to communicate historical perspectives and recognize diverse contributions to collective memory. CC, CIT, CCCC.	I.EFL.4.23.1. Consults at least two guided sources and organizes the information in a brief outline before writing, distinguishing main ideas from supporting details. I.EFL.4.23.2. Produces a short written report (150–200 words) on a local historical topic, organized into clear paragraphs with a brief introduction, development, and conclusion. I.EFL.4.23.3. Incorporates feedback from a peer revision session, identifying and correcting at least two issues in content, organization, or language accuracy.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.3.d.8. Short biographical text: structure (chronology, key events, motivations), use of timelines, and vocabulary of life stages. EFL.4.3.d.12. Short school report: structure (introduction, development, conclusion), organized paragraphs, and basic citation conventions. EFL.4.4.d.13. Past tenses in English: simple past (regular and irregular), past continuous, and the contrast between completed actions and actions in progress. EFL.4.4.d.14. Present perfect simple: used to connect the past and present, with time markers (already, yet, just, ever, never), and to contrast with the simple past. EFL.4.4.d.18. Connectors and discourse markers: contrast (however, although), cause (because, since, due to), consequence (therefore, as a result), and addition (in addition, furthermore). EFL.4.3.d.29. Local narrative and historical heritage: collective memories, events that shape a place's identity, and the diversity of voices and perspectives. EFL.4.4.d.34. Planning for written production: defining purpose and audience, organizing ideas in an outline, drafting, and revising.	EFL.4.2.p.10. Takes part in interviews with community members, asking follow-up questions, requesting clarification, and thanking participants. EFL.4.3.p.17. Reads short biographical texts about diverse people and identify key events, motivations, and cause-and-effect relationships. EFL.4.4.p.23. Drafts outlines and idea maps before writing to plan the text's content, order, and audience. EFL.4.4.p.30. Writes a short school report on a local history topic by consulting guided sources, organizing the information, and revising with peers. EFL.4.4.p.32. Writes short opinion paragraphs in English with a claim, reasons, and a supporting example or piece of evidence. EFL.4.4.p.33. Revises and corrects one's own drafts and those of peers using criteria of cohesion, coherence, lexical precision, and spelling. EFL.4.4.p.35. Produces short texts that combine information from two or three sources, organize the data, and cite the sources in a basic way. EFL.4.4.p.48. Reflects collectively on the learning processes at the close of a unit, sharing what was learned and what students still wish to explore.	EFL.4.4.a.15. Accepts error as part of the learning process and revises their own production with a willingness to improve. EFL.4.4.a.24. Recognizes writing and narration as ways of constructing identity and contributing to the community's collective memory.

PROGRAMA PILOTO

PROGRAMA PILOTO

Methodological Guidelines

Adolescents in EGB Superior encounter versions of the past through family memories, textbooks, media, and their communities. This competency invites them to use English to explore a small local historical topic, consult guided sources, organise information, write a short report, and revise it with peers. The aim is not to memorise dates, but to understand that history is built through research, selection, interpretation, and attention to the voices of people whose experiences are often overlooked.

The methodology that best fits this competency is Project-Based Learning (PBL), supported by guided research and structured writing workshops, organised around the recurring product “Small Histories of Our Place: A Folder of Short English Reports on Local Historical Topics, Written by Adolescents and Revised with Peers.” Each cluster selects a local topic, works with teacher-approved sources, organises findings, drafts a short report in English, exchanges peer feedback, and contributes the final version to a class anthology.

Teams work in rotating roles: archive scout (locates and records reliable sources), outliner (organises information into main ideas and supporting details), drafter (writes the historical report using clear structure and evidence), peer reviewer (provides feedback through a shared checklist), and citation steward (records source information and ensures references can be identified). Roles rotate so every adolescent practises both research and historical writing skills.

Interdisciplinary Connections

The interdisciplinary approach connects local historical research in English with language analysis, social inquiry, citizenship, cultural interpretation, and numerical reasoning. Through the creation of short historical reports, students learn to investigate their communities, organize evidence, and communicate the experiences of people and places with accuracy and respect.

Language and Literature. Students study the structure of historical reports — introduction, development, conclusion, supporting details, citations, and references — recognising that writing carefully organised texts in English strengthens expository writing skills across languages.

Social Studies. Students connect local topics with broader historical processes, exploring how microhistory and larger historical narratives complement each other. They learn that everyday experiences can reveal wider social, economic, and cultural transformations.

Citizenship Education. Students reflect on memory, representation, and historical responsibility, discussing whose stories are preserved, the ethics of collecting testimonies, and the importance of representing communities with respect and accuracy.

Cultural and Artistic Education. Students analyse photographs, maps, objects, buildings, and other material sources related to their topics, recognising that cultural artifacts provide evidence about the past and that captions and descriptions are forms of historical communication.

Mathematics. Students apply basic numerical reasoning to historical sources by interpreting dates, durations, populations, prices, and measurements. They recognise that numerical information requires context and can strengthen or challenge historical interpretations.

Overall, these connections position English as a tool for researching local histories, understanding diverse experiences, and communicating historical knowledge responsibly across communities.

Specific competency	Assessment indicators
SC.EFL4.24. Collective organization of actions to promote the rights of young people through school campaigns and informational materials that communicate the importance of these rights to peers, families, and the community, recognizing their role in participation, well-being, and inclusion. CC, CIT, CCCC, CSE.	I.EFL.4.24.1. Identifies at least three rights of young people relevant to the school or community context and explains why each matters, using clear, coherent sentences. I.EFL.4.24.2. Collaborates with peers to produce informational material (poster, leaflet, or short script) for a school campaign, dividing tasks and contributing to the final product. I.EFL.4.24.3. Presents the campaign material to peers, families, or community members, explaining the importance of the rights promoted and how the group organized its collective action.

Knowledges		
Declarative	**Procedural**	**Attitudinal**
EFL.4.3.d.12. Short school report: structure (introduction, development, conclusion), organized paragraphs, and basic citation conventions. EFL.4.4.d.15. Ways of talking about the future in English: will (predictions and spontaneous decisions), be going to (plans), and the present continuous with a future meaning. EFL.4.4.d.27. Rights of young people: Convention on the Rights of the Child, rights of participation, protection, and well-being in school and community contexts. EFL.4.2.d.28. Active citizenship and collective responsibility: participation in community decisions, school campaigns, and actions for the common good. EFL.4.4.d.36. Vocabulary by semantic fields: family and relationships; health and well-being; technology and media; the environment; work; and rights.	EFL.4.2.p.7. Presents information orally on an academic or community topic with visual support, organizing ideas clearly. EFL.4.2.p.8. Expresses opinions and justify them briefly with relevant reasons and examples in classroom conversations and discussions. EFL.4.2.p.11. Sustains discussions and dialogue tables on school and community topics, contributing proposals and concrete examples. EFL.4.4.p.24. Writes short prevention texts (posters, scripts, informational messages) about natural and human risks, using the imperative and the first conditional. EFL.4.4.p.25. Writes bulletins, announcements, and short promotional texts to communicate cultural and school activities in an organized manner. EFL.4.4.p.31. Develops informational materials for school campaigns on the rights of young people, such as posters, brochures, or clear, well-organized messages. EFL.4.4.p.41. Sets short language-learning goals, record progress, and reflect on the strategies that were used. EFL.4.4.p.44. Inquires about natural and human-made risks affecting the community, record the information, and produce relevant prevention texts. EFL.4.2.p.46. Cooperates with classmates on shared tasks and projects by responsibly distributing roles, resources, and time. EFL.4.2.p.47. Plans a campaign, project, or presentation with peers by defining its purpose, audience, stages, and materials.	EFL.4.2.a.10. Cooperates with classmates on group tasks, maintains participation, and acknowledges each person‘s contributions. EFL.4.2.a.13. Commits to the classroom‘s collective agreements and supports peers when they face difficulties during shared work. EFL.4.4.a.14. Takes responsibility for their learning tasks: plans them, meets deadlines, and communicates obstacles in advance. EFL.4.4.a.18. Recognizes and values individual and collective practices for preventing natural and human risks as a shared responsibility. EFL.4.3.a.20. Values the natural environment and the community’s practices of care as part of the common heritage that is inherited and passed on.

Methodological Guidelines

Adolescents in EGB Superior are familiar with the language of rights through school, media, and everyday conversations. This competency invites them to use English to explore youth rights, identify those that are meaningful in their own context, and communicate them through clear and engaging campaign materials. The aim is not only to name rights, but to transform them into messages that encourage reflection, participation, and collective responsibility.

The methodology that best fits this competency is Project-Based Learning (PBL), supported by collaborative campaign design and writing workshops, organised around the recurring product "Rights Worth Reading About: A Folder of Posters, Leaflets, and Short Scripts in English, Written and Revised by Adolescents for the School Community." Each cluster selects relevant rights, researches reliable information, drafts campaign materials in English, revises them through peer feedback, and presents them to a real audience such as classmates, families, or community members.

Teams work in rotating roles: rights researcher (collects and verifies information about the selected rights), campaign writer (creates clear messages with a hook, explanation, example, and call to action), visual designer (develops accessible layouts and visual supports), revising partner (provides feedback through different stages of drafting), and presenter and host (shares the campaign and responds to audience questions). Roles rotate so every adolescent practises research, communication, and collaborative creation.

Interdisciplinary Connections

The interdisciplinary approach connects rights education in English with language development, citizenship, social analysis, artistic communication, and personal well-being. Through the creation of campaign materials, students learn to communicate rights clearly, consider different perspectives, and transform written English into a tool for civic participation.

Language and Literature. Students analyze the rhetorical structure of campaign writing — headline, hook, argument, example, and call to action — while developing vocabulary related to rights and social issues. They apply these strategies in English to create persuasive texts and strengthen their ability to express opinions clearly in both English and Spanish.

Citizenship Education. Students explore how young people's rights are recognized, protected, and discussed at school, community, and national levels. Through the campaign process, they reflect on how communication can contribute to participation, inclusion, and the recognition of different experiences within their community.

Cultural and Artistic Education. Students examine the visual language of rights campaigns from different contexts, analyzing elements such as images, typography, composition, and tone. They recognize that design choices influence how messages are understood and that creating visual materials requires both aesthetic awareness and ethical responsibility.

Social Studies. Students investigate how the recognition of children's and adolescents' rights has developed across different societies. By reading short English-language texts from diverse contexts, they understand that rights are the result of historical processes and ongoing social dialogue.

Physical Education and Well-being. Students explore rights connected to health, rest, play, movement, and emotional well-being. They recognize that promoting these rights involves understanding how school environments, routines, and relationships influence the quality of young people's lives.

Overall, these connections position English as a tool for civic expression, social awareness, and meaningful participation, enabling students to communicate about rights and contribute to a more inclusive school community.
